The final comparison between theory and experiment at the end of Sec. III on p. R17 was stated incorrectly. The correct differences of theory minus experiment for the energy of the  $1s2s\ ^1S_0$  state are the following:

$2.09 \pm 0.28$  MHz from the  $P$  states

$1.44 \pm 0.24$  MHz from the  $D$  states .
