A HISTORICAL SURVEY OF THE TOWN OF WALKERVILLE ONTARIO, 1858-1922, INCLUDING AN EVALUATION OF THE INFLUENCE OF HIRAM WALKER AND HIS SONS ON THE GROWTH AND DEVELOPMENT OF THE TOWN UNTIL 1922

Submitted to the Department of History of the University of Windsor in Partial Fulfillment of the Requirements for the Degree of Master of Arts

by

Ronald G. Hoskins, B.A.

Faculty of Graduate Studies
1964.
This monograph has a two-fold objective. Fundamentally it is a historical inquiry of a general nature into the origins and growth of the former Town of Walkerville which was amalgamated into the present City of Windsor in 1935. Secondly, it is an attempt to assess the influence of Hiram Walker, from whom Walkerville derived its name, and his sons, in the evolution and ultimate development of the town from a sparsely populated settlement to a flourishing industrial enterprise.

The first chapter provides a brief biographical sketch of Hiram Walker as a youth and Detroit businessman and suggests the factors which led him to Canadian soil in 1856. A portrait of the infant post-office village of Walkerville is presented in Chapter Two.

The period 1880-1915 was one of tremendous import to Walkerville. The advent of transportation facilities, the ensuing influx of industry, both the result of Hiram Walker's initiative, transformed the small village into a bustling industrial complex. This transition is depicted in Chapter Three.

In 1890 the unincorporated village of Walkerville attained town status. Chapter Four posits the reasons for this development. Consideration is also given to the
problems of the fledgling municipality and two outstanding events in Walkerville’s social history. The chapter terminates with the death of Hiram Walker.

The fifth chapter provides a brief history of Walkerville institutions and landmarks including schools, churches, the library, and Willistead, the residence of E. C. Walker. The sixth and final chapter traces the additional territorial expansion of Walkerville which took place in 1922. Then, in retrogression, the street-development of the town is studied at various intervals. The decline of the Walker influence and conclusions complete the subject matter of chapter six.
ACKNOWLEDGEMENTS

In the compilation of a monograph on local history, one of the major difficulties encountered by the author is the amassing of adequate source materials. Frequently, anticipated repositories of material, such as national and provincial archives prove somewhat deficient for the student of local history. Instead, he is dependent on local archives, municipal institutions and even private householders for precious source materials. This study has proven no exception and without the splendid co-operation of numerous individuals, it would have been an impossible task. To those persons who may go unacknowledged, I assure them that they are not unvalued by the author.

My foremost obligations, I owe to the members of my committee who carefully read the manuscript and kindly gave me the benefit of their erudition. I remain eternally indebted to the Rev. F. J. Boland, C.S.B., Ph.D., Associate Professor of History, whose counsel and toil on my behalf were fundamental in the successful completion of this effort. I am most grateful to the Rev. D. J. Mulvihill, C.S.B., Ph.D., Professor and Head of the Department of History, whose observations, suggestions and encouragement have been of the utmost value to me. The constructive criticisms of Dr. R. A. Helling, Ph.D., Assistant Professor of Sociology and Head of the
Department of Sociology and Anthropology were extremely valuable to me in the preparation of this manuscript. I am forever grateful to Dr. N. F. Morrison, Ph.D., who permitted me access to his vast collection of local source material and whose suggestions derived from years of experience in the field of local history proved invaluable to me. Mr. Jack Boyer, Council Secretary, of the Windsor City Hall, toiled unsparingly on my behalf and his knowledge of municipal affairs and resultant suggestions are deserving of my utmost gratitude.

The firm of Hiram Walker-Gooderham and Worts were most helpful not only in permitting me to use their archives, but in the reproduction of many of the maps contained in the manuscript. Mr. Allen Douglas, curator of the Hiram Walker Historical Museum and his assistant Mrs. Francis gave unstintingly of their time and effort on my behalf. I owe a debt of gratitude to Mr. Babcock, the curator of the Burton Historical Collection, Detroit Public Library for his encouragement and advice and to his staff for their excellent cooperation. I am also grateful to the library staff of the University of Windsor for their generous assistance. My particular gratitude must go to librarians Mrs. McGaffey and Miss Magee for their interest and aid.

To the staffs of the Essex County Registry Office, the Carnegie and Willistead branches of the Windsor Public Library, to Miss Sandra Guillaume of the Ontario Archives,
the staff of the Toronto General Library, and the many clergymen and officials of the churches and church archives which I visited in my researches must go my gratitude. I am most grateful to private citizens such as Mr. R. L. Daniels and Mr. H. J. Shuttleworth for their interest and help in this project.

Naturally, any errors or omissions in content or style remain my sole responsibility.

CHAPTER I

YOUNG MAN WITH A VISION

Interested persons might well spend numerous hours over contemporary maps of Canada's southernmost county and still discover that Walkerville had eluded them. Such a problem is more apparent than real however, for the town in question legally expired nearly three decades ago.

On July 1, 1935, the once-thriving municipal corporation of Walkerville, officially surrendered its identity and with two of the other Border Cities that lay along the southern bank of the Detroit River entered into amalgamation with the City of Windsor, Ontario.¹ Today the portion of Windsor which previously was Walkerville constitutes a relatively diminutive area in east Windsor, and a visitor unfamiliar with this section would scarcely be aware that he was standing in what former scribes have referred to as, "the queerest place in all Christendom".²

Yet even now, within this small enclave, some of the finest residential areas in Windsor are located. Here too, in the environs of the lovely little gothic Church of St. Mary's, and the magnificent Tudor-style mansion of Willistead

¹Ontario Statute, 25 George V, c. 74, s. 4.
²Burton Historical Collection, Detroit Public Library. "Neither Town Nor City", Detroit Journal, May 10, 1890, p. 2.
Figure 1—Map of the Border Cities 1929, showing Walkerville's geographical relationship to the other three municipalities.
is a serenity which is difficult of duplication in other parts of the city.

Although Walkerville is officially relegated to the past, its name remains in common usage today. Almost thirty years after amalgamation, passengers on the Canadian National Railway still were given an opportunity to leave their coaches at Walkerville station or proceed two miles westerly until they should arrive at the Windsor terminal. When the latter perished under the wrecker's hammer several years ago, a modern edifice was completed on the site of the former Walkerville depot. Admittedly, "Windsor" is imprinted in large block letters on this new structure, yet "Walkerville" is placed underneath in parentheses, a de facto if not de jure testimony to the old town's lingering memory.

Insofar as Canadian customs services are implicated, Windsor and Walkerville remain separate ports of entry. In port directories, Windsor is distinguished from the Port of Walkerville. Numerous firms in the former Walkerville area, particularly those which had incorporated the name into their business, still retain their Walkerville post office address, and letterheads and stationery have yet to concede the fact of amalgamation. Naturally Hiram Walker-Gooderham & Worts, distillers, refuse to relinquish the name which over the

years has become synonymous with their liquid product, throughout the globe.

Staunch Walkervillians too, were very loathe to discard a name from which they derived such satisfaction through the years. Indeed, it is not strange today to hear Windsorsites and former Walkervillians speak of going "down to Windsor", or "up to Walkerville". The term "Windsor-Walkerville" is still used to indicate a provincial riding in Ontario politics. Consequently in many instances, sentiment, habit, and possibly stubbornness or even resentment have prevailed over legislative decree and in this sense Walkerville has never ceased to exist.

Hiram Walker, an American, founded Walkerville in 1858. I would hope to prove in this thesis that Walkerville grew prosperously, not merely as a child of fortune, but rather through the influence of Walker's pervasive personality, his progressive outlook and his faith in railroads and industry. A secondary factor in Walkerville's success was the cooperation of the populace, partially through necessity, but primarily through pride in the mutual task of building a model municipality. The railway, attainment of town status, the death of Hiram Walker and a waning enthusiasm exhibited by his sons, all were responsible for the decline of family control over the years. Fortunately, Walkerville was built on a firm foundation, and even after the Walkers no longer constituted an integral part of the

Note the Location of the Village of the Ottawa Indians on the Future Site of the Town of Walkerville.
community, the town continued to flourish, imbued as it was with the spirit of the founder.

The first inhabitants of the area under study were Indians of the Ottawa tribe under the renowned Pontiac. The same landscape that in the 1890's was to throb under the clangorous wheels of industry, knew the stealthy tread of the Indian moccasin two centuries previously. In the immediate vicinity, or possibly even on the site of the future town of Walkerville was located an Ottawa village and adjacent burying ground. Perhaps from this very encampment, the "Red Napoleon" and his brother denizens of the forest set out in early May, 1763, intent on wreaking their savage vengeance upon the unwelcome inhabitants of Fort Detroit. At length, Pontiac discovered that his combined forces were unable to dislodge the British, and consequently the Chief of all the Ottawas disguised his wrath and apportioned several land grants on the southern shore of the Detroit River to the newcomers. Such a transfer was effected by Pontiac to Lieutenant Edward Abbott of the Royal Artillery Regiment; a similar gift

6Burton Historical Collection, Detroit Public Library. MS Pontiac Deed of Land to Lieutenant Abbott of the Royal Artillery Regiment, September 17, 1765. Photostatic reproduction.
was bestowed on Alexis Maisonville.\(^7\) These gestures of the leader of a conquered nation probably constituted the territorial entirety of the future Town of Walkerville.\(^8\)

Hiram Walker whose patronym was to be perpetuated in the name of Walkerville, initially purchased acreage on the south bank of the Detroit River in 1856. On December 22, of that year, he completed a transaction for a tract of land in

\(^7\)Burton Historical Collection, Detroit Public Library. MS Pontiac Deed of Land to Alexis Maisonville, September 18, 1765. Photostatic reproduction.

\(^8\)In order to prove this hypothesis, it is necessary to show that these deeds were parts of farm lots ninety-four, ninety-five or ninety-six in the first concession, the Township of Sandwich East, which until 1922 constituted the Town of Walkerville. In September, 1765, a tract of land was granted to Lieutenant Abbott by Pontiac (Supra, Ch. I, p. 7). In September, 1769, Abbott transferred this land to Antoine Louis Labadie (Ibid.). On October 18, 1784, Antoine Louis Labadie married Charlotte Barthe and of this marriage ten children were born (Philippe E. Panet, "The Labadie Family in the County of Essex, Ontario", Essex Historical Society Papers and Addresses, [1913], 43). One of these children was Phyllis (Ibid.). In the last will of Antoine Louis Labadie, his land was divided among his wife and nine surviving children (Ibid., p. 51). By her marriage with John Hall, Phyllis Labadie had a son, Eugene Hall (Hiram Walker Gooderham & Worts Library, Walkerville, Ontario. Francis X. Chauvin, "Hiram Walker, His Life and His Work and the Development of the Walker Institutions in Walkerville, Ontario", [1927], Ch. VIII, p. 2). On his mother's death, Eugene Hall received his mother's ninth share of the Labadie farm (Ibid.). On December 22, 1856, Hall sold to Hiram Walker this portion of land (Hiram Walker Historical Museum, Windsor. MacDonald Historical Collection, MS Wilkinson Papers, 20-235, lot ninety-six. Cited hereafter as the Wilkinson Papers). Since Hiram Walker bought portions of lots ninety-five and ninety-six, and upon these founded the town, Walkerville at one time was the property of Pontiac. Further, in September, 1765, Pontiac deeded additional land to Alexis Maisonville, to the east of that land previously granted to Abbott (Supra, Ch. I, p. 7). This would appear to be lot ninety-four. Thus very probably most of the town was under Indian ownership.
lots ninety-five and ninety-six, in the Township of Sandwich East, the County of Essex. The price was three hundred English pounds.

The grantor was a descendant of the Labadie family of Essex County. Specifically, Hall was the great grandson of Pierre Descomps dit Labadie, a native of the City of La Rochelle, France, who was buried in Detroit, September 10, 1782. A son of the deceased, Antoine Louis Descomps dit Labadie, procured the tract of land which Pontiac had granted to Lieutenant Abbott four years previously, on September 14, 1769. On October 18, 1784, Antoine Louis Labadie married Charlotte Barthe, and the couple in time became the parents of ten children.

Antoine Louis Labadie died in 1806. His last will and testament, dated May 26, 1806, provided that his river-front properties be divided equally among the nine surviving

children of his last marriage.14 Subsequently one of the
daughters of the late Antoine Louis Labadie bequeathed her
ninth share to her son Eugene Hall by her marriage with John
Hall.15 This latter individual disposed of his inheritance
to Hiram Walker in 1856.

In the following January, Walker augmented his land
holdings in Essex County through the purchase of portions of
lot ninety-six in the first and second concessions from C. F.
Labadie16 for the sum of 250 pounds.17 On the same date,
January 24, 1857, Walker obtained an additional parcel of
land from grantors John Montreuil, Luc Montreuil and Alexander
Chapoton. This acquisition was located in the first two con­
cessions of Sandwich East in lot ninety-six.18 The sum in­
volved was 750 pounds.19 As a result of these real estate
purchases, Walker had acquired approximately 468 acres of
Canadian land.20

Hiram Walker was born in the town of Douglas, Massa­
chusetts, forty-five miles from Boston, on July 4, 1816.21

21Compendium of History and Biography of the City of
Detroit and Wayne County, Michigan (Chicago: Henry Taylor and
Young Hiram attended school until he was sixteen years of age. Then, apprehensive over the absence of opportunities locally, Walker determined to travel to Boston. There in 1836, he received employment in a dry-goods store. In this entrepot of commerce, the young clerk received a liberal business education which was to prove invaluable to him in his more mature years.22

The opening up of the West, or possibly the construction of the Erie Canal, which simplified travel westward stirred Walker's imagination and in 1838, still only twenty-two years of age, he arrived in Detroit, Michigan.23

The initial employment secured by the young easterner in Detroit was much similar to that which he had forsaken in Boston.24 He became a clerk in a grocery establishment on Atwater Street, immediately east of Woodward Avenue.25 Following this employment, he started his own grocery business on Atwater Street, near Bates Street.26 Success did not attend this venture, and the young New England entrepreneur entered into a partnership with one Jeremiah Ingersoll, who directed a tannery and leather business on Dequindre Street. Unfortunately fate intervened in this undertaking in the form of a

25Ibid.

26Ibid.
disastrous fire which resulted in the suspension of business. 27 Again Walker sought his fortune in the grocery trade at 39 Woodward Avenue. 28 At that time, a grocer stocked a wide variety of merchandise for sale, and Walker was no exception to this rule. Farmers might purchase such implements as scythes, swaths, cradles and rakers at the Walker Wholesale and Retail Store a few doors below Jefferson Avenue. 29 Cedar posts, "hewed on two sides", teas of various origins and types, by the chest and half-chest, cigars, pepper, sauce, boxes of writing ink, are all described as articles available for purchase at Walker's place of business as well. 30 One of the commodities kept for sale by Walker was cider vinegar. 31

A fairly inexpensive item, the young merchant disposed of his vinegar in gallon containers for ten cents, thus realizing only a meagre profit. Walker knew that if he could eliminate the wholesale price of the liquid he would stand to gain considerably. Further reflection prompted the Detroit merchant to conceive an idea of producing his own vinegar. After purchasing the required equipment, Walker constructed

31Ibid., September 11, 1850; October 3, 1851.
a small vinegar factory at 126 Woodbridge Avenue and began to manufacture vinegar for wholesale and retail purposes.\textsuperscript{32} As to the quality of this product, Edmund G. Desnoyers, M.D., a pharmaceutical chemist, reported that the Walker vinegar "contained no impurities whatsoever", yet possessed "the strength of the best standard vinegar".\textsuperscript{33} This vinegar factory was sold in 1858, by which time Walker had developed a thriving vinegar trade selling as much as several thousands of barrels at once. His ware was regarded as "an article vastly superior to that commonly sold".\textsuperscript{34}

In the 1850's Detroit groceries were also liquor dispensaries, actually, the two were synonymous.\textsuperscript{35} Since liquor, like vinegar, possessed definite consumer appeal, Walker determined to enter into the distilling of spirits on the basis of his successful vinegar venture. The first barrel of Walker's whisky was distilled in 1854, at 35 Atwater Street in Detroit.\textsuperscript{36} This product soon gained as fine a reputation as Walker's vinegar and both were much in demand, bringing their manufacturer extensive profits. Continued success in this lucrative enterprise was not at all assured.

however, primarily as a result of the ambivalent temperance attitude within the State of Michigan.

Eight years prior to Walker's arrival in Detroit, on February 19, 1830, the first temperance society in the city was organized under the title "The Detroit Association for the Suppression of Intemperance". Agitation for and against the sale of liquor was maintained throughout the next two decades until 1853, when numerous petitions resulted in the first "Maine" law of Michigan. Approved February 12, 1853, it provided:

That the Council ... on the first Monday of October might authorize some one person to sell liquor for mechanical and medicinal purposes upon his giving bonds to sell for those purposes only. The dealers were required to keep a list of persons buying liquor, the kind bought and a statement of the purpose for which it was to be used.

This legislation became operative on December 1, 1853.

On November 22, 1853, the Carson League for Wayne County was organized, its objective being to raise sufficient sums to pay for the enforcement of the recently passed "Maine" law. However the various temperance societies sustained a temporary setback on December 9, 1853, when the recently instituted legislation was declared unconstitutional thus bringing relief to the oppressed liquor dealers and grocers. Such encouragement was soon manifest in an

37 Farmer, p. 838. 38 Ibid., p. 840.
39 Ibid. 40 Ibid.
41 Ibid.
increased productivity on the part of liquor manufacturers and it was at this time that Walker started to engage in the production of spirits. The Carson League was suspended, and those who retailed in liquors were free to carry on their trade. Yet still the temperance question remained only in abeyance. Temperance agitation increased and subsequently the "Ironclad Maine Law" was passed at Lansing, Michigan, on February 3, 1855:

This law made the traffic in liquor entirely illegal. No one was permitted to sell except druggists, whose sole or principal business was the selling of drugs, and they might sell only for medicine; or as a chemical agent, or for scientific, mechanical or manufacturing purposes, or sacramental uses, and were required to give bonds to keep the law. All payments for liquor were declared illegal, and made recoverable at law. Bills for liquor were made non-collectable, penalties were provided for disobeying the law, and liquors seized might be destroyed.42

When the law became operative, on May 15, 1855, the immediate result was the closing of numerous groceries and saloons. Yet the remaining dealers displayed a willingness to oppose the new legislation. This spirit led to the reopening of many of the establishments. The defiant attitude of the merchants was fought with many arrests but few convictions, and in due time the zeal of the authorities subsided, in direct proportion, and the law was seldom enforced.43

The corollary was an increase in the number of saloons and

42Ibid. 43Ibid.
stores retailing in liquors and by 1858 temperance agitation was again present. The instability of the local legislation apparently forced Walker into additional enterprises of a more stable nature and gradually he began to emerge as one of Detroit's leading grain buyers. Originally Walker sought to supply Michigan millers, but by 1857, he had extended his operations so that they included many areas of the United States and the Canadas. Indeed, his grain-buying activities were among the several reasons for his decision to locate in Canada West.

By 1855, the Great Western Railway had been completed from the Niagara River to Windsor. The presence of the railway, with its terminus at Windsor was doubtless a determinant factor in Walker's decision to purchase real estate immediately east of that town. The importance of the railroad can scarcely be over-estimated. By 1858 trains of the Michigan Central and Michigan Southern Railroads carried passengers and freight from Chicago and Cincinnati to Detroit, at which point they were transported by Great Western ferries to the depot at Windsor. The Great Western road, via Niagara

44Chauvin, Ch. VI, p. 5.

Falls and the Suspension Bridge, provided the only rail service to the East. It was the most direct route to London, Hamilton, Toronto, Kingston, Prescott, Montreal and Portland. At Buffalo, connections were made with the New York Central system to such cities as Rochester, Syracuse, Rome, Albany, New York, Philadelphia, Baltimore and Boston. Windsor provided a direct link with the West and the Atlantic, which was only possible in 1855.

Amherstburg, Ontario, an incorporated village of about 2600 inhabitants by 1858, might have proven a suitable alternative for the Michigan distiller but it lacked the railway, although in the 1850's it appeared that Amherstburg would soon become a railway centre. Officials of the Great Western contemplated the construction of a branch line from Windsor to Amherstburg to connect with the Michigan Southern Railway which had established a through connection to Chicago in 1853. In 1855, the Amherstburg and St. Thomas Railway Company was incorporated to build from Amherstburg to St. Thomas. This company amalgamated with the Niagara and Detroit Rivers Railway in 1858, for the purpose of con-

51 Wilgus, p. 82.
structing a line between Niagara Falls and Amherstburg.\textsuperscript{52} All these projected lines failed to materialize however,\textsuperscript{53} and it was not until 1873 that Amherstburg was served by the Canada Southern Railway.\textsuperscript{54}

Significant as the railway was in itself, its importance was increased by the passage of the 1854 reciprocity pact between the United States and Canada. Article three of the treaty provided for the free admittance of a large selection of natural products of the two nations, including grain, flour and all kinds of animals.\textsuperscript{55} As a dealer in grain, such a clause must have proved particularly attractive to Hiram Walker; and the Windsor vicinity, because of its geographical location between the north-western states and the eastern states was an extremely favourable site. Walker was probably aware too, "that wheat and flour were by far the greatest

\begin{flushright}
\textsuperscript{52} Robert Dorman (ed.), \textit{A Statutory History of the Steam and Electric Railways of Canada} (Ottawa: The King's Printer, 1938), p. 413.
\textsuperscript{53} Currie, p. 168. Although the Canadian Board of Directors sought the extension of the Great Western to Amherstburg, the English shareholders were apprehensive of over-extension and condemned construction of the line and thus it was not built. The story of the Niagara and Detroit Rivers Railway was one of bad faith, a dishonest directorship who engaged in reckless extravagance and misappropriation of funds, the whole of which resulted in its disintegration before the line was built (Curry, pp. 256-59).
\textsuperscript{54} Wilgus, p. 83.
\end{flushright}
Canadian export to the United States, and in 1856 comprised over two-thirds of the total American imports from the province." 56

In addition to the lucrative transportation facilities and reciprocity, an immediate advantage was the presence of cheaper building materials and land. 57 A fourth factor which must have influenced Walker's ultimate decision was the absence of strong competition in the immediate Windsor area. Admittedly, there were two distilleries in Windsor, yet this relatively weak competition was insignificant when compared to the situation in Detroit, where distilleries were numerous. Moreover Canada West did not possess the unstable legislation existent in Michigan pertaining to the selling and manufacture of liquors.

As a dealer in grain, Walker realized too, that Essex County lacked a single steam milling plant for the production of flour. Such an operation could surely out-produce the antiquated windmills which sparsely dotted the southern shore of the Detroit River. 58

Finally, the knowledge that Hiram Walker had accumulated over the years in Detroit, of the conditions in Essex County, through his business relationships with farmers in

56 Ibid., p. 110.
57 Chauvin, Ch. VI, p. 5.
58 Ibid., Ch. VII, p. 7.
the vicinity, indicated that there existed an adequate supply of grain sufficient to sustain both a milling and distillery enterprise. Such motives as these, then, prompted Hiram Walker to become a landowner in Canada in the year 1857.

In 1857, Walker, then a resident of Hamtramck, a suburb of Detroit, commenced his daily trips to Canada West to personally supervise the construction of his distillery and flour mill.1 The following year, the facilities were ready for production to begin. The mill was the initial step in this and almost immediately the quality of the Walker flour brought the product considerable fame.

The distillery began to operate about the middle of 1858. Water and ice were obtained locally for the mash while most of Walker's malt was purchased in Toronto. The spirits were passed through charcoal, then coloured, and the product was ready for the consumer.2 At the outset, no system of rectification prevailed and production was governed by demand which might reach seven hundred gallons in twenty-four hours.3

In March 1859, Hiram Walker, his wife and family left their home in Hamtramck for their Canadian landholdings on

CHAPTER II

THE HAMLET

In 1857, Walker, then a resident of Hamtramck, a suburb of Detroit, commenced his daily trips to Canada West to personally supervise the construction of his distillery and steam flour mill. The following year, the facilities were ready for production to begin. The mill was the initial unit to open and almost immediately the quality of the Walker flour brought the product considerable fame.

The distillery began to operate about the middle of 1858. Corn and rye were obtained locally for the mash while most of Walker's malt was purchased in Toronto. The spirits were leached through charcoal, then coloured, and the product was ready for the consumer. At the outset, no system of maturation prevailed and production was governed by demand which might reach seven hundred gallons in twenty-four hours.

In March 1859, Hiram Walker, his wife and family left their home in Hamtramck for their Canadian land-holdings on the south bank of the Detroit River. Mrs. Walker was the former Abigail Williams who had the distinction of being the first white child born in the Saginaw Valley, where her father served as Indian agent. The couple had five children, three sons and two daughters, including Bessie, James Harrington and Jane. Bessie married Joseph Gooderham, who ran the distillery for many years. James Harrington and Jane were also involved in the business.

2 Ibid., Ch. IX, p. 2.

3 Ibid., Ch. IX, p. 3.
the south bank of the Detroit River. Mrs. Walker was the former Abigail Williams who had the distinction of being the first white child born in the Saginaw Valley, where her father served as Indian paymaster. The couple had five children when they arrived in Canada West, including two daughters, Elizabeth and Jennie Melissa, and three sons, Willis, Edward Chandler and Franklin Hiram. A sixth child, James Harrington was born in Canada in 1859.

The distiller's dwelling on the river bank was a large rambling frame house erected about 1839 by the Labadie family. On his arrival, Walker remodelled the old French residence to better accommodate his family by the addition of a third storey which served the children as a playroom.

It was not long before the newcomer became quite prosperous. This prosperity was derived not only from the operation of the Windsor Distillery and Flouring Mill, as the enterprise was known in its formative years, but from additional sources as well.

7 Chauvin, "Hiram Walker, His Life . . . " , Ch. IX, p. 5.
Hiram Walker soon determined that the distillery wastes might be used effectively elsewhere. He conceived the idea of raising hogs which were fattened on distillery slops. Soon the hog pens adjacent to the distillery were a prominent feature of the landscape. This enterprise was of sufficient import to provide employment for some fifteen or twenty farmhands who tended the animals which at times were approximately 500 in number. Toronto and Montreal markets served as outlets, while from the latter city, the Walker-fattened hogs might be dispatched to London and Liverpool.\textsuperscript{9} About 1862 the Great Western Railway built a switch into the stockyards to facilitate the shipment of hogs.\textsuperscript{10} This business was terminated in 1865 after the pens were ravaged by a cholera epidemic. The misfortune proved to be merely a temporary reversal however, as Walker turned next to the fattening of cattle obtained from Essex County farms.\textsuperscript{11} Like their predecessors, these animals thrived on the mash derived from the distillery wastes, and shipments abroad were continued with the pens sometimes filled with fourteen hundred to two thousand head of cattle.\textsuperscript{12}

Another source of income during this period was from speculation in American currency. The huge expenses of the American Civil War caused the United States' Government to issue millions of dollars of legal tender notes or "green-backs", so-called because the backs of the bills were printed in green ink. Uncertainty as to the result of the conflict as the war continued was sufficient to increase the value of gold and silver. At length, in June, 1864, this trend was maintained until the purchasing power of gold was thrice that of the Government notes. Hiram Walker believed that after the war, the American currency would regain its status, and so he proceeded to purchase as much "green-back" currency as his means permitted. When the war terminated, the United States currency returned to par and Walker reaped a small fortune.

In 1864, legislation in the State of Michigan prohibited the purchase of spirited beverages in that state. This led to the smuggling of liquors from Canada to Michigan centres. Walker was no deterrent to those desirous of ignoring the liquor laws of their state. On the contrary, "every day Walker's distillery was busy loading jugs and casks ... in American boats heading for the American shores and borders".

15 Ibid.
Since his distillery enterprise was apparently assured of success, and with all of his divers activities in Canada West reaping him handsome dividends, Walker returned to Detroit after a five year sojourn in Canada. The "Cottage", as the big frame house on the river front was known, remained in the family however, when Walker's father-in-law occupied it on the latter's departure. 16

Uncertainty surrounds the date at which the tiny settlement evolving about the distillery was commonly known as Walkerville. In the sixties, the names Walkerville and Walkertown were used by the inhabitants of the hamlet on the southern shore of the Detroit River. 17 In 1866 and 1867, Walkerville was described simply as:

A small village, situated on the riverside, about a mile above Windsor. It contains a distillery, carried on by Hiram Walker and Company, a hotel . . .; store, etc.; and several tenements built by Walker and Co. for the convenience of their employees, which number from eighty to one hundred. 18

On March 1, 1869, the name Walkerville was officially sanctioned by Ottawa when the settlement was recognized as a post-office village. 19

19Compendium of History and Biography of the City of Detroit and Wayne County, Michigan, p. 353.
Soon after Walkerville acquired official status, its first church was established through the generosity of Hiram Walker, who believed his employees would derive benefits from such an edifice. In 1870 a church was erected on the south side of present-day Riverside Drive, almost directly opposite the "Cottage" in which Hiram Walker had resided while in Walkerville.

Dedicated Sunday, January 8, 1871, the new church was of brick construction. The initial cost was twelve thousand dollars and the structure would seat 250 worshippers. The church basement was utilized originally for combined Sunday school and day-school purposes. The citizens

of Walkerville, almost exclusively Walker employees were surveyed as to the denomination of the church, and in this way it was determined that it should be a Methodist affiliation. The first pastor of the infant enterprise was a student minister, John Semmens, who was selected from Victoria College for the position by the President of the Canadian Methodist Conference. Provisions were made for the young man at the Walker "Cottage", where Semmens "ate at the Walker table and enjoyed all the comforts and luxuries which his palatial residence provided". After Dedication Sunday, Sabbath services were held regularly, a Sunday School was organized, and a Wednesday Prayer Meeting rounded out the week's activities. The youthful incumbent pastor was "distinctly given to understand that no reference was to be made to the liquor traffic during his stay but that when an ordained man was sent he might exercise his own judgement in regard to the matter". The first ordained minister did see fit to clarify his position on temperance and soon after the doors of the church were closed.

Following the discontinuance of the Methodist services, efforts were instituted to have the church adopted by the Church of England. However the leading church authorities were most reluctant to establish a new parish in a village of only two hundred inhabitants. Yet Hiram Walker assured the Anglicans that he would undertake to assume any financial burdens and consequently Church of England services began in 1874. Meanwhile the church was named St. Mary's after Mrs. Walker who died September 14, 1872 and a window in the church was installed in memoriam. As an Anglican church, rectors from All Saints' Church in Windsor were dispatched to Walkerville for afternoon services until May 31, 1874, after which time St. Mary's and St. Stephen's in Sandwich South became a single parish and received the services of a regular rector. In 1882 the parishioners totalled 139, with an average morning attendance of forty, while in the evening an average of sixty members and adherents were present at the services. The Sunday School had an average responsible for the declaration which resulted in the closing of the church. However both Semmens and Langford indicate the year as 1872 (cf. Letter from Semmens to Graham and Letter from Langford to Graham).

attendance of seventy-five pupils, and thirteen officers. In 1885 the church underwent extensive repairs. It was painted outside and within, the seats all cushioned and the floor carpeted. A basement furnace was installed, which permitted the removal of the unsightly stove pipes from the church interior. The church was then very comfortable, but the attendance remained rather small, partially due to the frequent changes of pastorates between 1882 and 1888. In the latter year a sizeable increase was noticeable in attendance with both Sunday School pupils and parishioners almost doubled and it appeared that this problem had been solved.

The public school remained in the basement of St. Mary's Church until 1879 or 1880 coming under the jurisdiction of school section number one of the Township of Sandwich East in 1877. In that year, Franklin H. Walker and Hiram Walker, son and nephew of the founder shared the trusteeship with H. A. MacAfee. After the school was removed from the church basement, a new institution was opened at the south-west corner of the present-day Devonshire Road and

Wyandotte Street. In dimensions, thirty by fifty feet, the two storey frame structure was erected at a cost of $1600.00, on a site donated by Hiram Walker. Surrounded by ornamental shrubs and a lawn, enclosed within a "handsome fence", this building remained in service for six years. In 1886, a fine brick edifice replaced the wooden structure and in 1890 this school was designated "The Walkerville Public School".

Satisfactory provisions being made for the academic and spiritual welfare of his people, the distiller now turned to the development of public utilities for the village and by the winter of 1875-76, Walkerville was illuminated by lamps erected at Walker's expense. Simultaneously a water system was developed and by 1877 the inhabitants of the village could boast of their own pumping station.

49 It is not immediately clear whether at the outset the waterworks was a continuation of the Windsor system or solely a Walkerville enterprise. The following excerpts seem to indicate the former. eg. "Messrs. Walker of Walkerville desire to have their village supplied with water from the Windsor waterworks and considerable discussion on the subject is now taking place. The Record says: Granting that Messrs. Walker are really in earnest in their desire for the water supply . . . . Various ways of accomplishing the object are open to them, the simplest of which would perhaps be to obtain
One of the most important steps in the 1870's was the establishment of a fire department in the village. Prior to its formation, conflagrations were fought by the collective efforts of Walkervillians who manned the local fire engine. While the villagers fought the fire, a telegram would be sent to the office of the Windsor Mayor who would dispatch the Windsor steam engine and hook and ladder wagon to the scene of the blaze. Understandably, such arrangements were unsatisfactory and on January 9, 1877, the Walkerville Fire Brigade was brought into existence.

At inception, the brigade consisted of three companies, No. 1 Hose Company, No. 2 Hose Company, and a Hook and Ladder Company.

Power from Parliament for the laying of drains by the township council of Sandwich East to connect with those in the streets of Windsor, and by giving Windsor a lump sum for keeping such mains full. (Amherstburg Echo, 1875, Article 22). And later, "F. A. Kirby is superintending the erection of the new Windsor waterworks at Walkerville." (Amherstburg Echo, 1875, Article 24.) The Windsor waterworks was being built about the same time, as in March 1872, the Windsor people in a referendum voted for the construction of a waterworks and by November 28, construction was well underway (see The Essex Record, November 28, 1872, p. 2). At any rate, by the winter of 1876, the system was complete as is indicated by the following excerpt: "Walkerville is making rapid strides toward modern improvement, and is getting to be a city in miniature. It has a complete system of waterworks, street lamps, etc. . . . " (Amherstburg Echo, ca. December 8, 1876, Article 45). This latter discovery seems to be verified by the minutes of the Walkerville Fire Brigade (Hiram Walker Historical Museum, MS Walkerville Fire Brigade Minute Book, 1877-79, 20-230).

50 The Essex Record, November 28, 1872, p. 2.

Ladder Company. All the firemen were employees of the Walker distillery and for some time H. A. Walker, a nephew of the town founder and superintendent of the distillery machinery department was the fire chief. The Walkers exercised rather strict control over the firefighters and in 1878 the brigade was given the opportunity to elect its own officers but only if the candidates were first approved by the Walkers. The monthly brigade and company meetings were most important and anyone absent was expected to provide justification for his absence to the satisfaction of H. A. Walker, the brigade chief. If the excuse did not meet with the superintendent's approval, the issue was put to a vote of those present at the meeting, and if the defendant was guilty of absence without reason, he was fined ten cents for his delinquency.

In the early years of the department, fires were infrequent and this necessitated monthly practice sessions. A

typical drill would commence with a race against the clock between the two hose companies from the firehouse to some pre-designated hydrant in the village. Once at the hydrant, they were required to couple 150 feet of hose and succeed in getting water through it. The Hook and Ladder Company would spend their practices in putting their ladders up to various roofs in the village, usually one of the distillery buildings, until they became proficient in this task. 58

The reason for the development of the brigade was simply for fire protection. However the department soon evolved socially as well, to a point where it became the most important group in the village in the latter respect. Periodically the fire companies were invited by the Walkers to participate in intra-company bowling contests in the Walker private bowling alley. Prizes, such as an ornamental fireman's trumpet, would be provided for the winning company. These competitions were treated most seriously by the firemen and the governing regulations were established before the contests, and were sometimes enforced during the match by F. H. Walker and E. C. Walker acting as scorer and referee respectively. 59 On still other occasions, the brigade was feted by a ball on the initiative of the Walkers, complete with music and decorated ballroom. 60

58 Ibid., May 30, 1878.

In 1878 the firm provided the diligent firefighters with a new hall and reading room. This was open to all firemen and to others whom the firemen wished to include as guests. The reading room gradually evolved into a type of social club, governed by rules promulgated by the membership. Dues were collected, officers of the reading room were elected and additional funds were derived from the utterance of profanities which were not permissible on the premises.

Sometimes the Walkerville Department would be a participant in various Dominion Day celebrations. For instance, on July 1, 1878, Windsor invited the force to share in her festivities. In order to appear presentable, the brigade members invited, purchased uniforms, and thus a distinctive apparel was introduced into the Walkerville Fire Department. On the aforementioned occasion, they must have presented a handsome appearance with the chief, H. A. Walker, astride his horse leading the Hook and Ladder Company and Hose Company No. 1. Their apparatus was gaily decorated and drawn by horses. The Minute Book of the Walkerville Brigade suggested loyally, if not modestly, that it was "no more than just to state the Walkerville Fire Department was the best looking part of the

This event was subsidized by the Walkers, who, possibly to inspire the firefighters in their tasks, presented them with a portrait entitled "Firemen of Constantinople" on a later occasion.

Other sources of entertainment prevailed for the inhabitants of Walkerville in addition to the annual Dominion Day parade. Much of this diversion centered about the distillery. The distillery wharf was the scene of constant shipping activity. In the seventies and eighties the Detroit River served as a commercial highway for large fleets of grain vessels, many of which tied up at Walkerville to load whisky and discharge grain. The schooner Sweepstakes, the Light Guard, the Bob Hackett, the Ada C. Allen, the R. C. Crawford and the Lake Breeze were only a few of the numerous vessels arriving downstream from ports such as Milwaukee and Chicago to the flourishing distillery enterprise at

Walkerville. Such an abundance of activity probably provided numerous interesting interludes for Walkerville residents.

An event of considerable import locally, took place on September 6, 1866, in the immediate vicinity which likely generated much excitement. This was the launching of the first iron car ferry to ply the Detroit River. The Great Western, as the vessel was christened, was launched at the Jenking shipyard immediately above Walkerville. Its construction was of interest to many living along the river and on Sundays, crowds would visit the shipyard to observe the progress of the builders. Business became so lucrative, that a transportation service was introduced to convey interested spectators from Windsor to the shipyard. The enterprising operator of this service was a Negro, a Mr. Jackson, who carried his passengers to the site in an antiquated yellow bus drawn by two horses. 75

Iron plates, 3/4 inches in thickness, eight feet long and two feet wide were shipped from Scotland to the Walkerville yard. These plates were numbered and thusly identifiable, were fitted in their proper places by the workmen. The boilers were manufactured at Hamilton, while the engines were built at Dundas, C.W. 76 The inhabitants in the vicinity

76 Detroit Advertiser and Tribune, November 2, 1865.
greeted the innovation of an iron craft with apprehension and the common feeling prevailed that the Great Western would sink upon launching. However the mammoth mass of iron was successfully launched. Her overall length was 240 feet and she became the first iron car ferry to work between Detroit and Windsor.

The presence of a church in Walkerville gave impetus to additional types of social entertainments. At the Yuletide, the annual Sunday School Concert provided pleasurable evenings at which carols were sung and presents distributed. The winter months were occasions too, for socials, featuring recitations, and pleasing vocalists from Walkerville, Windsor and Detroit to entertain those present. In the summer, church activities moved outdoors. Then, Franklin H. Walker, the son of the village founder, would provide his spacious grounds at "The Cottage" to be used for lawn parties sponsored by the ladies of St. Mary's.

If the Walkervillians wished to seek entertainment outside the village confines, they might partake of one of

the numerous excursions offered by the Great Western Railway. Special rates prevailed for these trips which might take the passenger from Windsor to Hamilton, Toronto or the majestic falls at Niagara. 82

Should the Walkerville people desire a much shorter trip, they, like countless others, had merely to travel down the river road to the Sandwich Mineral Springs. This phenomenon was the result of an ill-fated venture in the 1860's. In early 1866 the Sandwich Petroleum Oil Company was founded to explore possibilities of oil in the Sandwich vicinity. The ensuing operations failed to locate any oil deposit but the drillers did encounter mineral water. The news of this discovery spread with the utmost rapidity and soon several enterprising local entrepreneurs developed the Sandwich Mineral Springs. A large hotel, bath houses, and additional improvements were made. The public response was overwhelming and tourists from all corners of the continent arrived in Sandwich to bathe in the beneficial waters. On holidays and Sundays, twenty-thousand people might invade Sandwich to avail themselves of the facilities at the Springs. Omnibuses ran from Windsor to Sandwich, and for the inhabitants of Windsor, Walkerville and Detroit, the Springs provided an opportunity for recreation and relaxation. 83

82 Detroit Daily Advertiser and Tribune, August 20, 1863.
83 Frederick Neal, The Township of Sandwich (Sandwich: Frederick Neal, 1909), pp. 58-61.
Additional forms of entertainment were available in the neighbouring town of Windsor. Amateur concerts were held there frequently for various needy benefits. Windsor also hosted such amateur theatrical productions as "The Lady of Lyons" which was accessible to the inhabitants of the distillery village, should they desire to travel the mile and one-half distance to the downriver community.

Various sports seemed to be popular in Walkerville and provided an additional source of recreation and amusement. The popularity of bowling has already been related. In the 1880's baseball was evident, with the Windsor "Clippers" and Detroit "Pearls" providing opposition for the Walkerville team. Windsor lacrosse teams engaged Walkerville opposition, although the latter was probably not an organized club, but rather a group of local enthusiasts. Boat-racing provided an additional sport attraction, in which the Walkers entered their own craft. In 1889 a gun club was organized among

some of the men in the village.\footnote{Ibid., ca. April 12, 1889, Article 58.}

By 1884, the unincorporated village of Walkerville consisted of four streets extending north and south, and five running east and west.\footnote{Goad, Map of Walkerville, Ontario, February 1884, Sheet Two.} Probably the first to be laid out was the Walker Road or Fifth Street about 1860.\footnote{Chauvin, "Hiram Walker, His Life . . .", Ch. XII, p. 5.} West of the Walker Road, and parallel, were Fourth, Third and Second Streets in that order. The east-west streets in the village were Sandwich, on the riverfront, with Assumption, Brant, Wyandotte and Tuscarora Streets parallel and south of Sandwich Street. Tuscarora constituted the de facto southern limits of the hamlet.\footnote{Goad, Map of Walkerville, Ontario, February 1884, Sheet Two.}

The distillery buildings were situated on the riverbank between the main street (Sandwich Street) and the river. These buildings included the feed mill and drying elevator, a ferry house by 1884, barber shop, the grain elevator and malthouse, the Walker residence and driving shed, various warehouses, waterworks, mill and distillery, boiler house and rectifying still house and a large lumber yard and coal yard.\footnote{Ibid., Sheet One and Sheet Two.} On the south side of Sandwich Street, was a three
storey structure built in 1882. The first floor housed several stores, while the second floor was the location of the Walkerville Music Hall, which served as a type of community centre, in which dances, entertainments, lectures and socials might be held, and which accommodated nearly six hundred persons. A reading room was also located on the second floor, while various lodge rooms occupied the remaining storey. Also in this triangular area bounded by the railway tracks, Sandwich Street, and the Walker Road, were located a brick stable, several bonded warehouses, a wooden firemen's hall and reading room, the little brick church, a butcher shop, the fire-engine house, a paint shop, a cooper shop where all the Walker barrels were manufactured and hooped, a carpenter's shop, the Walker planing mill and stave factory, with its large adjacent wood-pile. All these structures without exception were owned by the Walker interests.

A building "boom" in the early eighties resulted in a considerable increase in the number of residential dwellings. By 1884 the west side of Third Street from

Assumption Street south to Tuscarora Street was almost entirely filled with homes. This was not true of the east side of Third Street, where only the block between Wyandotte and Tuscarora Streets was crowded with houses. The east side of Fourth Street had scattered dwellings, as did Second Street between Assumption and Brant Streets, no homes were to be found south of Tuscarora Street in the early eighties. 101

Almost the entire populace, which numbered approximately six hundred in 1882, 102 were employed in some capacity by the Walker family in their numerous enterprises. Every workman the Walkers hired was offered a lease to a Walker cottage. Otherwise he would very likely be denied employment. Walker never sold the land or the company-built cottages. Consequently Hiram Walker was able to control the type of individual that would live in the village. 103

In the early eighties, only three industries existed in the settlement. The dominant one was naturally the Walker distillery and its associated components, the Kerr Brothers Engine and Foundry Company, and the Dominion Syrup and Sugar

Refining Company\textsuperscript{104} which was organized about 1878.\textsuperscript{105}

In summation, after twenty-five years of existence, the unincorporated village of Walkerville had a population of approximately six hundred souls. Almost all of these people lived in cottages built and owned by Hiram Walker. They worked in Walker establishments. They used and drank water pumped through pipes laid by the Walkers. They received police protection free of charge and likewise free fire protection from the Walkers. Those religiously inclined might attend St. Mary's Church constructed by Hiram Walker, and named after his late wife. The children of the community attended school on a site donated by Hiram Walker. In the absence of a banking establishment, the inhabitants might place their savings in the Walker bank at seven per cent interest rates.\textsuperscript{106} Walkerville, indeed, was Walker's town and he planned it and exercised complete jurisdiction over it for his own benefit and for those who resided in it.

CHAPTER III

WALKERVILLE IN TRANSITION

Walkerville remained a rather small unincorporated post village until the middle eighties. Almost entirely the property of Hiram Walker, the hamlet was partially settled only in the north-east section. Industrially, Walkerville was dominated by the giant distillery complex and its complement industries. A decade later, by 1895, the same village would have experienced a transformation which changed it into a bustling industrial town, a miniature "Birmingham of Canada", still, however, strongly influenced by the Michigan distiller. The catalytic factor in this amazing metamorphosis was the development of transportation facilities under Walker's initiative.

The initial event in this transition occurred in 1880 with the establishment of ferry service between Walkerville and Detroit. Walker had left his Walkerville "Cottage" in 1864. Nevertheless his numerous Canadian interests compelled him to traverse the Detroit River daily. Since it

---

was the only one available, the distiller was obliged to utilize the Detroit-Windsor ferry. These trips in themselves were not unduly time-consuming, but the short distance to Walkerville sometimes was most tedious, as the river road was a sea of mud at various times of the year.\(^3\) In Detroit, Jefferson Avenue East was paved with cedar blocks, and Walker reasoned that a vessel running between the American shore and the distillery would prove most advantageous. Such logic prompted him to lease the ferry "Essex" from the Jenking Bros. in 1880.\(^4\) Docking facilities were erected at the northern end of Second Street in Walkerville and at Walker Street in Detroit, one block east of Joseph Campeau. Initially, the service was irregular, since the primary purpose of the arrangement was to provide for Hiram Walker's personal convenience. Not until 1881, did the innovation become a commercial enterprise necessitating a more regular schedule.\(^5\) That year witnessed the introduction of the "Ariel" constructed by Captain John Oades of Detroit, specifically for the Walkerville run.\(^6\) This vessel was wooden, steam powered and ninety-six feet in length.\(^7\) Throughout the summer, it followed a

\(^6\)Amherstburg Echo, November 11, 1881, Article 177.  
triangular course touching at Belle Isle. An additional steamer, the "Sappho", was maintained by the Walkers exclusively for excursion purposes.

The ferry terminus in Detroit was moved in 1882 to Joseph Campeau where it was to remain for the duration of the ferry service. Until 1888 the enterprise was known as Walker and Sons Ferry, but the latter year saw the inauguration of the Walkerville and Detroit Ferry Company with Hiram Walker, E. C. Walker, F. H. Walker and J. H. Walker as the first officers of the firm. Until the mid-twenties, the enterprise was not a financial success, and during the period from 1888 to 1922, only two years were profitable. In an attempt to overcome the perennial losses, and to better compete with the rival downstream service, a schedule change in 1913 introduced a fifteen minute service in lieu of the previous twenty minute interval. In the summer of the same year, a new companion ferry, the "Essex", constructed by the Toledo Shipbuilding Company was introduced on the short run. The presence of two vessels made possible a ten minute rush hour service in 1914.

13 Ibid., Ch. XX, p. 6.
Water transportation was important for Walkerville, but under the guidance of Hiram Walker, land transportation was to occupy a more vital role in the development of the town.

Two years after the commencement of the ferry service, in 1882, a fierce conflagration swept the Walkerville waterfront levelling the extensive stock enclosures adjacent to the distillery. Personnel and apparatus of the Detroit Fire Department, in addition to the three Walkerville companies, battled the stubborn blaze for nearly seven hours before it was under control. The flames spread with great rapidity through the wooden, hay-filled structures, and only the presence of a strong wind which blew towards the river saved the village from possible destruction. Fruitless efforts were undertaken to liberate the occupants of the barns, 331 head of cattle, and the total loss caused by the catastrophe was estimated at twenty-five thousand dollars.\(^{14}\)

Even prior to the devastating holocaust, Walker had decided to dismantle the wooden cattle barns and replace them with fire-proof distillery buildings.\(^{15}\) Indeed, the stockyards were in the process of reconstruction at the corners of the Walker and Tecumseh Roads, approximately a mile and one-half south of their riverfront location. By 1882 eight

\(^{14}\) Amherstburg Echo, ca. November 1882, Article 267.

\(^{15}\) Ibid.
brick barns had been erected which possessed facilities for 1600 head of cattle. The relocation of the stockyards was the initial link of a most important development in Walkerville's history and that of South Essex as well, as Hiram Walker, distiller, became a railroad builder.

Walker derived his first railway experience from the construction of a short line from the stockyards at the corner of Tecumseh and Walker Roads to the Grand Trunk Railway on the riverfront. This miniature railway was built in 1883, and its purpose was to transport Walker cattle from the yards to the Grand Trunk siding for shipment to eastern points. About the same year, difficulties arose over the transport of hay from Walker's extensive holdings in Colchester Township to the new cattle barns. After pressing the loose hay into bales using a steam hay presser, mammoth wagons drawn by two teams of horses or tractor engines hauled the hay to Amherstburg from where it was shipped to Walkerville by

20 Ibid., ca. April 10, 1885, Article 113.
water. The wagons, nine feet in width, were capable of bearing loads of up to nine tons, although usually they were required to move burdens of five tons. The immensity of these trailers may be indicated by the eight foot height of the rear wheels, while the smaller front wheels were three and one-half feet in diameter, with five inch tires. The weight of such massive vehicles wreaked havoc on the rather flimsy county bridges, sometimes damaging them and generally causing much inconvenience and distress to the rural populace. Moreover, the relocation of the cattle barns proved most inconvenient since the vessels had to be emptied of their cargo at the Walker dock, then the shipment had to be reloaded for conveyance to the stock enclosures, a distance of approximately one and one-half miles. These two factors must have influenced Walker's decision to extend his line and build a bonafide railroad, but he saw additional personal gains as well. The American distiller possessed extensive agrarian holdings in extreme south Essex County, and it was desirable that improved communications be established between this Marshfield area and Walkerville. Then too, there seemed to be a distinct possibility of incorporating the Walker interests with those of the inhabitants of South Essex

21 Ibid., October 27, 1882, p. 8.
22 Ibid., ca. April 10, 1885, Article 113.
23 Chauvin, Ch. XXII, p. 2.
who lacked adequate railway facilities at that time. The Grand Trunk Railway served the northern portions of the county along Lake St. Clair and the Michigan Central Railway (originally the Canada Southern) followed a diagonal route from Tilbury on the northwest to Gordon (Amherstburg) on the southwest. The introduction of proper rail facilities would surely provide extensive freight and passenger traffic. A railway to those areas of South Essex would enable Walker to transport his farm produce directly to the distillery and cattle barns with a minimum of handling. In addition, it was in the winter that his herds of cattle required feed and a railroad would remove that element of uncertainty associated with water transportation in the cold season. The presence of a railway with the possibility of connections with eastern rail lines would enhance the value of the Walker land-holdings as well. In addition, the period of the 1880's was one of rapid railway expansion, a development which had been given increased impetus through the Dominion subsidy policy of 1882, which provided for government assistance of $3200.00 per mile on intraprovincial lines. This was undoubtedly a consideration in the actions of the distiller. Finally, in Walkerville, Walker reigned undisputed monarch of all under his surveillance. If he

25 Chauvin, Ch. XXII, p. 2.
cherished a railway, he would have it, if humanly possible. As in his other endeavours, he would tolerate no interference from other sources, but would accept nothing less than complete control over the enterprise.

Accordingly, on May 1, 1885, the Dominion Parliament enacted legislation to incorporate the Lake Erie, Essex and Detroit River Railway Company. The incorporators were: William Scott, F. H. Walker, John Coventry, Alexander Cameron, Hiram Walker, Alison L. Hitchcock, W. A. Foster and M. A. McHugh. The authorized capital of the company was to be one million dollars divided into ten thousand shares of one hundred dollars each. Under the authority of an Order In Council of March 25, 1888, the Lake Erie, Essex and Detroit River Railway was admitted to contract for the construction of its line on April 6, 1888.27 On December 22, 1888, the L.E.E. and D.R. Ry. was authorized to open the line as far as Cedar Creek station for traffic.28 By the spring of 1889, the railway had spanned the thirty-eight mile distance between Walkerville and the Town of Leamington.29 The stations

en route were located at Walkerville, Walkerville Junction, Pelton, Oldcastle, Paquette, McGregor, New Canaan, Marshfield, Harrow, Arner, Kingsville, Ruthven and Leamington. At this time the rolling stock of the Lake Erie, Essex and Detroit River Railway consisted of four locomotives, seven first-class passenger coaches, two second-class coaches, a single baggage car, twenty cattle cars, with ninety-five flat cars. The authorized capital of the line was one million dollars and by June 30, 1889, stockholders had subscribed for $200,000 or two thousand shares. The Walkers owned 1670 of them. The entire cost of the thirty-eight miles between Walkerville and Leamington was $406,625.

\(^{37}\) Ibid. The earnings are listed as $19,332.99 (see Summary Statement of Earnings for the Year Ended June 30, 1889, pp. 36-37). The total operating expenses are listed as $13,882.47 (Summary Statement of Operating Expenses for the Year Ended June 30, 1889, pp. 38-39). Therefore the profits are $6,950.52.

\(^{38}\) Chauvin, Ch. XXII, p. 7.
until 1878, when a promotion elevated him to the position of chief clerk in the passenger and auditing departments. In 1888 the Northern Railway Company became part of the Grand Trunk system, and in early 1889, Mr. Woollatt left the Grand Trunk and assumed the position of general superintendent and traffic manager with the Walker road. On May 1, he was elected to the position of general manager.\(^3\) In addition to his railway duties, he became prominent later in the development of Methodism in Walkerville.\(^4\)

On July 31, 1891, a private act passed by the Dominion Parliament authorized the change in name of the Walker railroad to the Lake Erie and Detroit River Railway, deleting Essex from the name of the company.\(^5\) Two years later, on April 1, 1893, the railway which had been incorporated under federal and provincial charters, and in this sense, constituted two separate corporations, was officially amalgamated into a single company acting under Dominion authority.\(^6\)

Under the supervision of Woollatt, the Lake Erie and Detroit River Railway was granted government permission to

extend its line to Ridgetown, Ontario, on December 20, 1892. 43

In the spring of 1893, the extension was not only completed but in addition, a branch line from Foster's to Decew's Mills was laid. 44 The expenses of the extension were defrayed in part by a Dominion subsidy and municipal bonuses. 45 By this time, the Lake Erie and Detroit River Railway derived the greatest portion of its profits from freight, although it still remained popular for passengers as well. 46

In 1894 the railway was further extended through the lease of the London and Port Stanley Railway Company which connected London and Port Stanley on Lake Erie. The lease was to be for twenty years from January 1, 1894. The Walker road was to pay an annual rent of $10,000 and ten percent of

\textsuperscript{57}Ibid., Summary Statement of Characteristics of Roads, etc., for the Year Ended June 30, 1903, pp. 32-33.
The railway venture proved to be an unqualified success\(^5\) from the very outset. Numerous excursions were featured by the company which brought passengers from outlying points to Detroit and vicinity, utilizing the Walkerville ferry in the process. Sometimes the excursionists numbered several hundred,\(^5\) especially in the summer months, when Belle Isle became a favorite retreat for inhabitants of such towns as Leamington, Ruthven,\(^6\) Kingsville\(^6\) and Harrow.\(^6\)

In 1889 the enterprising Walkers led by Edward C. Walker constructed a huge hotel at Kingsville, known as the Mettawas.\(^6\) However this venture never proved as successful financially as the other Walker investments and was a constant source of consternation to the elder Walker, especially after two years.

\(^5\) Dominion of Canada, *Sessional Papers* (1903), Vol. 8, No. 20: "Steam Railways, Summary Statistics", Summary Statement of the Operations of the Year and Mileage for the Year Ended June 30, 1902, pp. 40-41. For the year ending June 30, 1902, the road transported 546,058 passengers and carried 651,247 tons of freight. Also the net earnings for the same period as above were $183,813.82 (Ibid., Summary Statement of Earnings for the Year Ended June 30, 1902, pp. 56-57). These figures represent the business conditions of the Walker railway just before it was sold by the Walker sons in 1903.

Figure 6- Map Showing the Extent of the Lake Erie and Detroit River Railway by 1903. In this map the Walker Railway is designated as the Chesapeake & Ohio Railway.
of operation resulting in a $35,000 deficit. In any event, every summer, the "Mettawas Special" transported prospective guests to the Kingsville hotel. Those who found recreation in visits to the legitimate theatre availed themselves of theatre excursions at reduced rates over the Lake Erie and Detroit River Railway system. On such occasions, patrons might familiarize themselves with such attractions as Miner's Theatre, Whitney's Opera House and the Detroit Opera House. After an evening in Detroit, patrons boarded the last Walkerville ferry at 11:30 P.M. Then the late Saturday night special pulled out of Walkerville laden with passengers bound for their respective destinations.

The success of the Lake Erie and Detroit River Railway did not rest entirely on its passenger service however. Indeed, freight was essential to the well-being of the venture. In the 1880's and 1890's, Essex County was the centre of an important lumbering industry and the Walker railway participated actively in the export of this commodity to the United States. Sometimes twenty-five and

thirty-five flatcars of elm logs would be shipped to Walkerville, where they would be towed by water to such destinations as Detroit and Wyandotte, Michigan.

An additional important item of freight, and one to which the rail service actually gave impetus, was the shipment of fresh fish, market vegetables and fruits from southern Essex County to the cities of Detroit and Windsor. Perishables shipped from Leamington at night could reach Detroit breakfast tables and markets the following morning.

In 1889 the Lake Erie and Detroit River depot was erected in Walkerville. A conservative structure in terms of size, the two-storey building with slate roof and stone foundation on the corner of Assumption Street and Second Avenue was declared the "handsomest station in Western Ontario", upon completion. The interior was finished in

red oak. The offices of the general manager, traffic manager, superintendent and station agent occupied the first floor, in addition to the separate waiting rooms for ladies and gentlemen. The second floor was partitioned into several offices and the boardroom in which the railway officials held periodic meetings. Later the grounds about the station were landscaped and the flower gardens must have presented a very attractive sight to passers-by.

In January 1903, the Lake Erie and Detroit River Railway was purchased by the Pere Marquette interests for a sum of $2,870,000. The little railway which was started as an expedient to a cattle-business had proven a most lucrative investment for the Walker family. Between 1887 and 1892, the road had accumulated a surplus of $25,902.75. The operations for the period 1892 to 1903 showed a flourishing credit balance of $175,204.08. Just before the sale of the railway, the three Walker sons received dividends of $163,200.57 - quite a pecuniary testimony to the business acumen of their late father.

Transportation became an integral part of the Walker-ville scene in the 1880's and the final stage in this

---

78Ibid., June 30, 1893, p. 4, Article 98.
transition was the advent of the Windsor-Walkerville electric street railway in 1886. The instigator of this development was Richard Bangham, a Windsorite, who in 1885 returned to his native town of Brighton, England, for a visit. There, for the first time, he witnessed an electric railway in operation. This mode of transportation fascinated him and he proceeded to obtain photos and acquire all available information pertinent to the mechanics of the railway.\textsuperscript{80}

On his return, Bangham related his impressions of the electric railway to another resident of Windsor, J. W. Tringham, who was somewhat of a genius in matters electrical. The idea appealed to the latter and immediately he investigated the feasibility of an electric railway to connect Windsor and Walkerville, the Grand Trunk Railway being the only commercial tie between the two places.\textsuperscript{81} Mr. Bangham, a Windsor councillor, obtained a franchise for the proposed line and in the vicinity of the Grand Trunk Railway bridge at Walkerville, a large barn was built in which the electric car was constructed.\textsuperscript{82} The roadbed was laid along present-day Riverside Drive from the foot of Ouellette Avenue to the

\textsuperscript{80}Carnegie Library, Windsor. Richard Bangham and Fred Neal, "Windsor Had First Electric Car to Operate in America", The Windsor Evening Record, May 23, 1917, as filed in Windsor Ferries Streetcars and Buses, IX, 49: Historical Scrapbooks.

\textsuperscript{81}Ibid.

\textsuperscript{82}Goad, Map of Walkerville, Ontario, December 1890, Sheet Three.
railway bridge in Walkerville. In June, 1886, the Windsor-Walkerville electric car line, purported to be the first commercial electric railway in North America, went into service. A description of one of the cars, estimated the length of the vehicle at:

Approximately twenty-nine feet, with seats on both sides. Two pulleys ran along the top of the car connecting the overhead wire with the dynamo. Occasionally, when the pulley would become disconnected, the operator, who sat in the centre of the car, was forced to climb on top of the trolley to reconnect it. The Tringham dynamo had ample power to pull not only one car but several on busy days.

In its infancy, Hiram Walker looked on the electric railway as a decided evil, as it diverted a great many patrons from his Walkerville ferry service. Prior to the introduction of the new transportation medium, residents in the immediate vicinity found it advantageous to patronize the ferry service at Walkerville when visiting Detroit. Once in Detroit they might take the Jefferson Avenue street-car line to the downtown area. However with an electric railway line at their doorstep, many commuters found it preferable to avail themselves of the new equipment on the Canadian shore and then patronize the Detroit-Windsor ferry

83 Bangham and Neal, Historical Scrapbooks, IX, 49.
85 Morrison, Garden Gateway to Canada, p. 123.
The ill-feeling harbored by Hiram Walker vanished with the construction of his railway however. Indeed Walker not only welcomed the electric railway later, but expressed a desire to have it extended from the Grand Trunk Railway bridge to the Walkerville terminus of the Lake Erie and Detroit River Railway. In this way the distiller hoped that additional patrons might find their way to his railway.

Less than two months elapsed after the introduction of the electric road before Tringham died. This misfortune constituted a rather severe reversal to a fledgling system whose unique operation, with its numerous technical difficulties, puzzled many people. As a result the Windsor-Walkerville line was early beset with problems. A very severe winter in 1886-87 compelled the company to put on "three large omnibuses equipped with runners". Recurrent electrical failures prompted the electric railway officials to announce their intention of purchasing a locomotive to pull the cars in 1888. Later, the same year, the railway used horses to draw the cars and this type of motive power persisted in 1890, two years later, since this was the cheapest and most reliable method of operation.

87 Ibid., ca. May 1888, Article 347.  
89 Ibid.
In the fall of 1891 an electric line was opened along Wyandotte Street as a supplement to the riverfront route. Six years later, the electric cars in Walkerville traversed the following route: from the easterly limit of the City of Windsor on Sandwich Street (Riverside Drive) east to Susan Avenue (Chilver Road), south along Susan Avenue to Assumption Street, east along Assumption Street to Second Street (Devonshire Road), then once more south to Wyandotte Street. By this time, a line had been completed along Ouellette Avenue in Windsor, hence the connection of the two systems gained the appellation of "The Belt Line". A ride around this circuit gained in popularity and in time proved to be a favorite diversion of area residents.

Walkervillians enjoyed daily service at fifteen minute intervals between the hours of 6 a.m. and 10 p.m., and half-hour service thereafter from 10 p.m. to 11:30 p.m. The line was operated on Sundays, only at the discretion of the system's officials and at intervals deemed to be in the interests of the company. Adult fares were five cents,

and might take the patron as far as Sandwich, where the Windsor-Sandwich Street Railway had operated since the 1870's. Children over ten years paid adult fares, but those between the ages of two and ten years paid three cents. Those infants under two years rode free, if accompanied by an adult. A small saving was available to those patrons who purchased tickets at the price of six for twenty-five cents.95

In later years, Mr. Boomer, the first recorded proprietor of the road, relinquished his ownership and the Windsor and Walkerville electric railway became part of the Sandwich, Windsor and Amherstburg system which was purchased by the Detroit United Railway interests on August 31, 1901.96

The most imposing corollary of the transportation innovations of the eighties was the industrial expansion that followed them. The location of Walkerville on one of North America's mightiest commercial streams, plus the international communication facilities provided by the Walker ferry was a distinct asset to prospective entrepreneurs. However the prominent factor in the industrial growth of Walkerville was the advent of the Lake Erie and Detroit River Railway. This railroad possessed connections with trans-continental lines thereby providing nation-wide outlets for industrialists.

95Town of Walkerville By-Law, No. 148, July 13, 1897.

96Carnegie Library, Windsor. Fred Neal, "Windsor Had First Electric Car to Operate in America", The Windsor Evening Record, May 23, 1917, as filed in Windsor Ferries Streetcars and Buses, IX, 50: Historical Scrapbooks.
Until 1888, the Walker distillery and its attendant enterprises completely dominated, or possibly more accurately, comprised the Walkerville industrial scene. In that year, the following Walker interests were located in the village: the Walker distillery, the Walker malthouses, the Walker cooperage, the Walker copper shop, the Walker planing mill, the Walker lumber yard, the Walker brickyard, in addition to the Walker ferry and the Walker railway.  

By the summer of 1888, the only other enterprises in the village were the machine shops of Kerr Brothers and a small laboratory used occasionally by Parke, Davis and Company, manufacturing chemists of Detroit.  

The Kerr Brothers enterprise was the initial establishment which seems to have been partially independent of the Walker family, to locate in Walkerville. The firm was founded by the Kerrs in 1873 and until 1886 occupied a site at Assumption and Third Streets. In 1889 the business

was removed to Fifth Street (Walker Road), and there occupied a large brick structure, the former site being required by the Lake Erie and Detroit River Railway. In 1890, the industry had attained such proportions that it was deemed advisable to effect a change to a corporate form of management, and the enterprise became the Kerr Engine Company. Mr. E. C. Walker became president of the firm, and William Kerr, who had come to Canada in 1869, assumed the position of vice-president and superintendent. A second Kerr, H. O., of Sandwich, held the post of secretary-treasurer. The Kerr Engine Company manufactured various types of marine engines, waterworks machinery, valves and hydrants, in addition to general machinery. In full production, in 1894 the enterprise provided work for one hundred employees. In 1887 Parke Davis and Company of Detroit, chemists, established a branch laboratory for the whole of Canada in Walkerville in a brick building erected for them by Hiram

Walker. Perhaps their decision was influenced in part by the Canadian tariff on pharmaceutical preparations which was prohibitive at the time. Apparently this enterprise was so successful, that on two occasions they expanded their laboratories until by 1890 Parke Davis was a mammoth concern. It occupied a large three storey brick building at the corner of Fifth and Sandwich Streets in Walkerville. Employing seventy-five hands in 1894, subsequent expansions necessitated a staff of 125 by 1898.

Perhaps one of the most flourishing industries to settle in Walkerville following the advent of the Lake Erie and Detroit River Railway was the Globe Furniture Company. Incorporated by Letters Patent on August 13, 1889, with a capitalization of $50,000, this firm manufactured and sold church and school furniture, as well as household furniture. The Globe Furniture Company stock was divided into five hundred shares of one hundred dollars each, of which the Walker family owned the controlling portion of 270 shares. F. H. Walker was the president of the Canadian firm and he and his

as well as the First Presbyterian Church of Walkerville. After twenty-one years in Walkerville, an agreement dated May 3, 1910, authorized amalgamation with the Waterloo School and Office Furniture, and the Globe Company moved to Waterloo, the name Globe Furniture Company being adopted.

The year 1890 was synonymous with the establishment of an iron-working industry in the town. Like the majority of other Walkerville industries, the Walkerville Malleable Iron Company was located on the Walker Road, along the Lake Erie and Detroit River railway. As in most of the other industries in the distillery town, the Walkers owned extensive shares in this enterprise. In 1893, E. C. Walker held the presidency, while his brother Franklin served as vice-president. In the same year shareholders had subscribed for $70,000 of stock, of this amount the Walker investment

totalled $32,450.128 Except for a small two-storey section, housing offices, the plant was a single storey structure129 with a frontage of 380 feet on the Walker Road and a depth of 420 feet. The firm produced an assortment of products including a number of agricultural implements and railroad appliances such as brake wheels, door fasteners and covers for oil boxes.130 The Malleable Iron Company employed about 175 workers.131

In 1889 the Ontario Basket Company became part of the Walkerville industrial complex. Originally, a Sarnia firm, the Walkers purchased sufficient stock so as to enable them to remove the operations to Walkerville which they did in 1889. The structure occupied by the Basket Company was a two-storey building on the Walker Road. The first floor contained the heavy machinery on which the raw forest products were refined for future use. Specialized equipment on the remaining level was required for the construction of the various types of boxes and baskets. Grape boxes, wired wooden peach crates, bushel baskets, in addition to axle grease

plant also produced ales, stout, malt, malt extract and porter. The staff numbered fifty-five employees by 1913. 139

In 1888 the Barnum Wire and Iron Works moved from Windsor to a large factory constructed on their behalf by Hiram Walker and Son. 140 The firm had outgrown its Windsor site and was obliged to seek additional room elsewhere. 141 The inducements offered by Walker of a cheap or possibly a free site, 142 with free water, 143 plus the excellent transportation facilities available proved irresistible to company officials and so the Barnum Wire and Iron Works became one of the several firms to locate in Walkerville about 1890. At the outset prosperity seemed to attend the enterprise and contracts arrived from such distant points as Jamaica, West Indies, 144 as well as closer cities such as Toronto and Montreal. 145 Locally, in 1890, the Barnum concern created the artistic wire work in the Walkerville branch of the Canadian Bank of Commerce, the first commercial

bank in the village. However the venture proved to be short-lived as in 1891 E. T. Barnum took his firm to Toronto. The following year, the Page Wire Fence Company of Ontario, incorporated August 10, 1892, capitalized at $40,000, occupied the two-storey brick building on the north side of Assumption Street at First Street (Kildare Road). In 1898, the authorized capital of the firm was increased to $100,000 and E. C. Walker as the manager held fifteen shares of the one thousand available. The plant employed between forty and fifty persons in the various departments.

In the fall of 1891, John Bott leased a building on Sandwich Street (Riverside Drive) from the Walkers in which he proceeded to manufacture malt, malt stout and wine.

of malt. Bott also held the important position of head maltster in the Walker distillery,154 and his ability in his selected field of endeavour gained him recognition at the Chicago World's Fair in 1893 for his pure malt stout.155 Bott left his Walkerville business in 1897 to assume direction of the Maumee Brewing Company plant in Toledo, Ohio.156

The very same year that John Bott left Walkerville, a most important industry was established just east of the Walkerville town limits.157 Although strictly speaking, not within the area of study, its repercussions were most important and thus it deserves passing recognition here. The Milner-Walker Wagon Works was incorporated by Letters Patent dated October 6, 1897. The amount of capital stock was $250,000 divided into five thousand shares of fifty dollars each. Hiram Walker owned 2500 shares of stock in the enterprise and was president until his death in 1899. The company sold and manufactured wagons, sleighs, and "wheeled vehicles of every description", which obviously provided them with great latitude of production.158

The new firm located in the

abandoned buildings of the old Walkerville Grape Sugar Refinery, which had come to Walkerville in 1882 to manufacture starch and glucose.159 The latter never appeared to be a flourishing enterprise however, enjoying only occasional periods of prosperity with the result that in 1889, the firm closed and the plant was vacated.160 The Milner-Walker wagon firm entered into production in January 1898,161 with a capacity output of twenty-five wagons daily when in full production.162 On January 12, 1899, Hiram Walker died at his home in Detroit, and his stock which by 1900 totalled 2500 shares of the 2661 shares subscribed for, was bequeathed to the Children's Free Hospital and Harper Hospital of Detroit.163 These institutions pressed for their monies claiming that their constitutions did not permit them to carry stock.164 Consequently, voluntary liquidation took place October 5, 1900,165 with the one hundred employees

losing their jobs. On December 10, 1900, Messrs. Wm. McGregor and John Curry purchased the entire property and assets of the Milner-Walker Wagon Works. Under the guidance of these two gentlemen, the Walkerville Wagon Works, as their firm was known, entered into an agreement with the American Ford Company for the production of the latter's product in Canada. The result was the incorporation of the Ford Motor Company of Canada on August 17, 1904. Such were the origins of the Ford enterprise in Canada. On a lesser scale, a community was to develop about this firm in much the same manner as Walkerville became a town centered around the Walker interests.

The success of the Ford firm probably induced the Everett, Metzger and Flanders Company, auto manufacturers, to purchase the property of the Globe Furniture Company in 1910. The purchase price was to be paid by an issue of stock of like amount in the new E.M.F. of Canada. All the shareholders in the defunct furniture company possessed an interest in the enterprise and the facilities of the Globe Furniture Company were transformed into a plant suitable for the manufacture of automobiles. However production was short-lived. In the winter of 1911-12, friction developed between

166 Amherstburg Echo, October 5, 1900, p. 1, Article 118.
167 File of the Milner-Walker Wagon Works.
the Studebaker Company, distributing agents for E.M.F. in the United States and the latter, as to terms and methods of distribution. The ultimate result of the differences was the sale of the American E.M.F. to the Studebaker Corporation. The sale of the parent American firm led to the disposal of the Canadian subsidiary as well, and after two years of operation in Walkerville, in 1912, Studebaker replaced E.M.F. and began to assume responsibility for the Canadian enterprise. 169 By 1913 Studebaker employed 325 workers, who performed their daily tasks in four acres of factory space. 170

Additional industries allied with the motor car establishments moved into Walkerville following the turn of the century. All were located on Walker Road which was the industrial hub of the town. 171

On December 6, 1900, the Canadian Bridge Company was incorporated under Letters Patent and thus became the

169 Chauvin, Ch. XXV, p. 7.

171 Among them may be cited: Gramm Motor Truck Company; New Dominion Motors, Limited; Detroit Trailer Company - auto trailers; McCord Manufacturing Company - auto radiators (Vernon's City of Windsor, Sandwich and Walkerville Directory [Hamilton: Henry Vernon and Sons, 1915], pp. 528-29). Two others were: Automobile Tops and Trimming; The Walkerville Carriage Goods Company (Windsor Directory Including Walkerville and Sandwich [Ingersoll: Union Publishing Company, 1910], pp. 410, 416). An additional one was Canadian Automotive Light Company (Union Publishing Company's Windsor Directory Including Walkerville and Sandwich [Ingersoll: Union Publishing Company, 1904], p. 310).
second steel firm to locate in Walkerville. The industry capitalized at $250,000, and it manufactured, sold and erected all types of railroad bridges, and various kinds of machinery of structural steel and iron. Located on the Walker Road, the bridgeworks appears to have been the largest employer of men in the town by 1913, when one thousand workers passed through the gates daily and took home with them $800,000 in salaries annually. Seven years later, in 1907, the Trussed Concrete Steel Company of Canada came to Walkerville and by 1913, 195 employees earned their livelihood with this firm.

By the beginning of the new century, Walkerville could no longer properly be referred to as "the distillery town". Rather, it had become a centre of diversified industry, nearly all of which was located along the Walker Road, while the remainder of the town was residential in character. In addition to those already mentioned, by 1915 many other industries had made Walkerville their home.

174 Ibid., p. 32.
175 They included: W. E. Seagrave and Company - fire apparatus, west side Walker Road; Berry Brothers - paint and varnish manufacturers, east side Walker Road; Peabody's Company - overalls, Sandwich and Susan Avenue; Leather Label Over-Haul Company - Sandwich Street; Anthony Wire Fence Company of Canada - east side Walker Road; Dale Iron Works - west side Walker Road; Canadian Hoskins, Limited
The period 1880 to 1910 was a time of startling transition for Walkerville. The tiny hamlet founded by Hiram Walker in the 1850's became a booming industrial complex - at least one author has referred to it as the "Birmingham of Canada". Although such a description might be construed as somewhat of an exaggeration, undeniably, by 1910, Walkerville was a prosperous centre of diversified and numerous industrial enterprises. In this transitory period, the Walker family constituted an overwhelming factor. It was Hiram Walker's ambition to build his town into a manufacturing centre. Through the extension of transportation facilities and his efforts to encourage various industries to Walkerville, the elder Walker had attained a phenomenal degree of success before his death in 1899.

- electric furnaces, Sandwich Street; Mitchell Brass Foundry - automotive castings, Assumption and Susan Streets; Canadian Dust Proof Weather Strip Company, Limited - weatherstrip manufacturers, Walker Road; The Walker Light and Power Building housed the following small industries - The Heinn Company - loose leaf devices; Detroit Fuse and Manufacturing; Diamond Manufacturing Company - machinery; E. W. Jeffress and Company - manufacturing chemists; Wilt Twist Drill Company, Limited (Vernon's City of Windsor, Sandwich and Walkerville Directory for the Year 1915 [Hamilton: Henry Vernon and Sons, 1915], pp. 528-29).

176 Compendium of History and Biography of the City of Detroit and Wayne County, p. 354.
CHAPTER IV

WALKERVILLE ATTAINS TOWN STATUS

Almost the entire preceding chapter was devoted to the transportation and industrial revolution which swept Walkerville in the 1880's and which remained a dominant characteristic of the municipality throughout the period under study. In stressing the evolution of manufacturing interests in Walkerville however, the civic developments have been neglected, and in the latter area a process of consolidation was taking place by 1890.

The settlement founded by Hiram Walker in the late 1850's retained its lowly status as an unincorporated village until 1890. On the twenty-ninth day of January, 1890, a petition was forwarded to the Ontario Legislature requesting the incorporation of Walkerville as a town. In the petition, the significant contributions of the Walker family to the development and progress of the settlement were clearly established:

The sewers in said village have all been constructed by Hiram Walker and Sons, the fire brigade of fifty-two men; the fire appliances, the police force of two men, one for day and one for night duty, the repair of the sidewalks, other than the sidewalks on the main street, the night watch service, and the

---

electric lighting of the streets have been provided at the expense of the said firm.\(^2\)

The result was that Walkervillians were experiencing "the enjoyment of better water and lighting service, fire and police protection than the inhabitants of the majority of small towns . . .".\(^3\)

Under such conditions, what motivated the villagers of Walkerville to seek incorporation as a town? Such a query presents somewhat of a conundrum, yet possibly three factors may be detected as motives for the transition from unincorporated village to town. They include the rapid growth of the town, necessitating a change in status, a profit motive on the part of the Walkers, and the fear of possible annexation by neighbouring Windsor.

Since the founding of the village it had been under the immediate jurisdiction of the rural municipality of the Township of Sandwich East. So long as Walkerville remained a small hamlet, this relationship was apparently quite acceptable. The unincorporated village and the township probably experienced common problems and possibly shared similar viewpoints on pertinent matters. However as Walkerville became increasingly populous and as she acquired industrial characteristics, both factors gave impetus to new municipal problems which could best be solved by a change in status accompanied by extended municipal powers. The village was

\(^2\)Ibid., pp. 3-4. \(^3\)Ibid., p. 4.
experiencing growing pains too. The best industrial sites in Walkerville were located upon the line of the Walker railway and "the addition of a comparatively few factories would occupy all the desirable strip fronting on the road and bounded in the rear by the Railway". For this reason, Walkerville wished to obtain additional territory for future industrial development. As a growing industrial community, she also required more sites on which to build homes for the inevitable numbers of workers who would follow the various industries to Walkerville. Both these factors involved extensive planning, and the delineation of definite municipal boundaries through incorporation would permit a more effective long-range program to take place.

The influx of industries, with the anticipated increase in population required "good roads capable of withstanding heavy traffic, good lighting, police and fire protection and proper sanitary provisions which could not be afforded by the Municipality of Sandwich East". Although the Walkers had participated actively in such matters in the past, they apparently declined to commit themselves further in this respect.

Unquestionably the Walker family had been the primary factor in Walkerville's successful growth. Even as a town builder, however, Hiram Walker remained an entrepreneur whose ultimate objective was profit. Incorporation would probably

---

4Ibid., p. 3. 5Ibid.
release the Walkers from the continued maintenance of a police force and fire department. As a town, Walkerville would become more important, its size would likely increase and as extensive owners of local real estate, handsome profits might accrue to the Walkers. At the same time, the family could easily expand their lighting system and waterworks to serve a larger community and reap the resultant income. In part then, Walker's attitude toward incorporation might have been governed by the profit motive. There is no doubt that Walkers favored the transition. Prominent among the 208 signatories of the petition for incorporation are included the names of Hiram Walker, his three sons, Edward Chandler Walker, J. Harrington Walker and F. H. Walker, and the distiller's two nephews, H. A. Walker and C. M. Walker.

Important as the two preceding factors, especially the first one, may have been in the decision to seek Walkerville's incorporation as a town, fear of annexation by neighbouring Windsor was possibly the transcendant motive for Walkerville's action. Nor was such apprehension the result of idle speculation in 1890. Editorials in the Windsor Record refer to Walkerville as a "Windsor suburb which was almost part of Windsor". Walkervillians were referred to as "our

6Ibid., p. 4. 7Ibid., pp. 4-9. 8Carnegie Library, Windsor. The Windsor Record, November 23, 1888, p. 4.
East Enders", and one columnist predicted that it was only a "question of a few years at most when Walkerville shall be absorbed by Windsor...". Letters to the editor of the Record indicate that Windsorites envied Walkerville and that annexation of the village was desirable. In 1889 a Windsor Councillor declared himself in favor of the annexation of Walkerville by Windsor.

9Ibid., November 2, 1888, p. 4.
10Ibid., April 27, 1888, p. 5.
11Ibid., May 18, 1888, p. 7.
12Ibid., October 5, 1888, p. 2. The writer notes the frequent trips of Windsor lawyers to Toronto to interview the Government on the annexation of Walkerville. When asked on their return to Windsor why Walkerville was not to be annexed the reply was "'Walker is there'".

13Amherstburg Echo, March 22, 1889, n.p. In this same article however, it was determined through "reliable sources", that Hiram Walker would be favorable to such a scheme. This latter statement would scarcely be in harmony with Walker's obvious designs for self-sufficiency as is witnessed by the town's own utilities, ferry system and railroad. Moreover it is difficult to see what possible advantage Walker could derive from amalgamation. Consequently the reliability of the "reliable source" is questionable. The article appears accurate otherwise however as there was a council meeting that week and the councillor mentioned in the article was present (Windsor City Hall Vault, MS Minute Book, Town of Windsor, January 1885 to June 1890, March 18, 1889, p. 531). That the councillor's statement is not in the minutes does not mean that it was not made since the minutes merely record the work of the council and not the debates on various questions. There is no question that the Windsor Council was interested in the incorporation of Walkerville as a town. In February, 1890, a special committee was appointed "with instructions to take such actions as they may deem proper in regard to the incorporation of Walkerville". However the committee never submitted a report apparently. (Ibid., February 17, 1890, pp. 674-75.)
Even Windsor's actions about this time seemed to indicate that she was perhaps of a "manifest destiny" mind. In the summer of 1888, portions of Sandwich West were annexed to Windsor. There was no apparent reason why Walkerville could not prepare for a similar fate. These factors must be considered with the knowledge that Windsor was rapidly approaching city status, which she acquired in 1892. Even exclusive of territorial content, Walkerville's growing industrial assessment would have provided a strong foundation for an infant city to build upon.

Annexation, it would appear, could only have been repugnant to Walker. Powerful as Hiram Walker was in Walkerville, as part of the greater Windsor scene his local influence would diminish considerably. Walkerville's population was one-tenth that of Windsor's and the village could scarcely aspire to more than token representation in a Windsor Council. In contrast, as a separate, autonomous municipality, Walkerville might temporarily thwart any Windsor design of annexation. So far as Walker was implicated, it was true that his power would probably suffer with the

---

14 Minutes of the Windsor Town Council, June 11, 1888, pp. 404-5. Windsor annexed parts of lots 68, 69, 70, 71, 72, 73 and 74 in the first concession of the Township of Sandwich West.

15 Burton Collection, Detroit Public Library. "Neither Town Nor City", Detroit Journal, May 10, 1890, p. 2.

inauguration of an elected Walkerville government. Such action would still constitute the lesser of two evils however, and as the town's foremost taxpayer he would still retain considerable influence. Temporarily, at least, incorporation seemed to provide a solution for the problems of the Walker family and the townspeople.

Whatever the reasons for the transition, an act incorporating Walkerville as a town was assented to on April 7, 1890 by the Ontario Legislature. The boundaries of the newly created municipality were as follows: on the west, the alley between Lincoln and Gladstone Avenues, from the north limit of Tecumseh Road to the Detroit River; on the east, from the northern limits of the Tecumseh Road to the Detroit River, for the most part following the easterly limits of the Lake Erie and Detroit River Railway's lands, save for a short distance between the northerly limits of the aforementioned lands and the river bank where it became very irregular for a short distance. Generally, however, the tracks of the Lake Erie and Detroit River Railway constituted the eastern boundary of Walkerville.

---

17Windsor City Hall Vault, MS Minutes of the Walkerville Town Council, September 22, 1896, p. 397. Cited hereafter as Walkerville Council Minutes. At this time the Walkers paid 8/10's of the Town's taxes.

18Ontario Statute, 53 Victoria, c. 108.

19Ibid., s. 2.
The town was to consist of three wards: St. Andrew's, St. George's and St. Denis' Ward, embracing roughly the western portions of the town (from First Street to the western town boundaries), the middle of the town (from First Street to the alley between Third and Fourth Streets) and the eastern remainder of the town respectively.\(^{20}\)

The government of the Town of Walkerville was to consist of a mayor and nine councillors, three from each ward.\(^{21}\)

It is most difficult to determine the population of the town at incorporation as several conflicting figures are available. However, a reasonable estimation would appear to place the population at about nine hundred.\(^{22}\)

Nominations for the first mayor and council were scheduled for Monday, May 5, 1890.\(^{23}\)

\(^{20}\) Ibid., s. 3.

\(^{21}\) Ibid., s. 7.

\(^{22}\) In this particular endeavour a variety of figures confront the researcher. Some list the population as one thousand (Ontario Archives, Toronto. Ontario Gazeteer and Business Directory, 1888-89 [Toronto: R. L. Polk and Co., 1889], p. 1125). (See also Ontario Statute, 53 Victoria, c. 108.) In 1891, the year following incorporation, the government census lists the population at 933 (Population, 1871-1941 [Ottawa: King's Printer, 1944], p. 100). Chauvin gives the population figures for 1890 as 798 (Hiram Walker-Gooperham and Worts Ltd., Library, Walkerville, Francis X. Chauvin, "Hiram Walker, His Life and His Work and the Development of the Walker Institutions in Walkerville, Ontario", [1927], Ch. XXVIII, p. 4). This number is verified by the Detroit Sunday News-Tribune (Burton Historical Collection, Detroit Public Library. "Walkerville", Detroit Sunday News-Tribune, p. 17). Chauvin might well have used the latter source too, and in this case the author of this thesis seems inclined to emphasise the government statistics in his estimate.

\(^{23}\) Ontario Statute, 53 Victoria, c. 108, s. 4.
enthusiastically by the Walkerville citizenry as initially the candidates were numerous, with no apparent possibility of any nominee gaining office by acclamation. Among the candidates, Thomas Reid, the head distiller of Hiram Walker and Sons loomed as the favorite contender for the mayoralty seat. However, at that time, H. A. Walker, a nephew of the town founder proclaimed his candidacy for the office of mayor. The other nominees withdrew and as the sole remaining contestant, the election was unnecessary, and H. A. Walker was honored with the distinction of being the first Mayor of Walkerville. The councillors likewise obtained their posts by acclamation. They included: Robert Kerr, Thomas Smith, Thomas Reid, J. H. Ellis, Patrick Walsh, John Bott, J. Edgar, F. Pulfer and George W. Busch. Additional appointed officials in the town were: town clerk, Cecil H. Robinson; treasurer, Dr. C. W.

24 Amherstburg Echo, April 25, 1890, Article 75.

25 The Detroit Journal charges that Hiram Walker "controlled" the town's first election (Detroit Journal, May 10, 1890, p. 2). The Amherstburg Echo fails to make such an accusation but noted one week that there would be a plentiful number of candidates for the offices available, while in the next issue it noted an election by acclamation, which would seem to indicate some unexpected development in the election during the interim period (Amherstburg Echo, April 25, 1890, Article 75 and Ibid., ca. May 16, 1890, no article number given).

26 Amherstburg Echo, ca. May 16, 1890, no article given.

27 Ibid., ca. May 16, 1890, Article 79.

Hoare; medical health officer, Dr. Hoare; assessors, C. M. Walker and Charles Chilvers; solicitors, Patterson, McHugh and Leggatt; tax collector, Andrew Reid. The highest paid position in the civic hierarchy was that of the town clerk, with Cecil H. Robinson receiving an annual stipend of two hundred dollars. The mayor's salary was one hundred dollars. There is no indication that the councillors received any pecuniary compensation for their services.

The Council convened the second and fourth Tuesday of each month at 7 p.m. and debated the issues at hand not later than 11 p.m. when it retired without formal adjournment. A substantial amount of work done by the Walkerville town fathers was resolved through standing committees. These were the committees of: Finance and Assessment; Fire, Water and Light; Board of Works; Public Market; Printing and Education; Licenses; Charity; and Police. Most of the committees are self-explanatory, but the Market Committee was the most

29 Ibid., No. 1, June 10, 1890.

36 Ibid., No. 11, June, n.d., 1890.
curious of all, since the town was not to possess a market for many years after incorporation. Consequently, until the market was established in 1924, the Market Committee dealt with those matters that fell outside the jurisdiction of the other committees. The Fire, Water and Light Committee was one of the most important of the three member committees. It was required to report periodically on the state of readiness of the fire brigade and apparatus which protected the town. The fire department was a privately owned service even after incorporation however, and the Walkers took care to maintain it in good condition. The same committee was to regulate and superintend those matters pertaining to the Walkerville water supply and the town lighting. In this instance it was merely a matter of securing an annual agreement with the Walker family, which controlled both these aspects of the town's public utilities.

The obvious responsibilities of the Police Committee included the supervision and regulations of the town's constabulary. Like most other organizations in the distillery town, Hiram Walker was responsible for the development of the Walkerville police force. Apparently the first constable to patrol the Walkerville streets was one Amos B. Griffiths who was engaged by the Walkers about 1887. Prior to the assumption of

37 Ibid., No. 1053, December 22, 1924.
38 Ibid., No. 11, June, n.d., 1890.
39 Chauvin, Ch. XXXIV, p. 5.
his law-enforcement duties in Walkerville, Griffiths had been turnkey in the Sandwich jail. The force was expanded by the Walkers and by 1890 it consisted of Chief Griffiths and an additional constable. The firm dressed the officers in resplendent uniforms and the two-man detachment underwent a monthly inspection at the main office of the distillery. The Chief of the Walkerville Police Department was no sinecure's position, and he was obliged to patrol the town just as his constable. A slight concession was made to Griffiths in granting him the privilege of selecting the hours during which he was to perform his duties. In an effort to encourage regularity and efficiency within the constabulary, Walker established a call box system, and the patrolmen were required to ring in hourly, their calls being recorded and checked by the distiller the following morning. This protection was rendered without charge to the residents of Walkerville. On the elevation of the village to town status in 1890, the police force was placed under the jurisdiction of the corporation. Its strength was retained at two constables, including the chief, except in the summer months when tramps sometimes appeared in

the town, at which time additional patrolmen might be engaged on a temporary basis. With incorporation the duties of the policemen became more burdensome. They were then obliged to report on the number of darkened lamp globes on Walkerville streets and also to serve as truant officers for delinquent Walkerville school children. The salaries of the force, which numbered three by 1897, appears paltry by contemporary standards. The chief received $650 annually and the two constables $570, these salaries being attained only after a number of increases during the initial decade following incorporation.

Strangely enough, the first "lock-up" or jail was constructed in Walkerville about 1880, apparently seven years before the initial law-enforcement agent arrived in the hamlet. The new "lock-up" was built at an approximate cost of $275 and it was situated north of the Great Western Railway line, probably on the southern side of Sandwich Street (Riverside Drive) in the close proximity of the firemen's

It was very small, with only two cells, but was apparently deemed adequate to accommodate Walkerville wrongdoers. This place of detention served to lodge town malefactors until the early 1890's, when agitation developed to demand the building of a new "lock-up". It was felt that the one then standing was poorly situated and unfit for use, so much so that the chief of police was reluctant to show the structure to visitors asking to see it. Dissatisfaction continued, until in 1896, when a lot was purchased on the east side of Walker Road just south of present-day Riverside Drive for $300 from the Walkerville Land and Building Company, a Walker enterprise. The second structure to house the town jail also served as an armory for Walkerville's new military unit. The 21st "Essex" Battalion was organized in June 1885 and included five companies, one of which was No. 4 Company stationed at Amherstburg. In 1895, the latter Company was transferred to Walkerville and in 1907 became "D" Company of the 21st Essex Fusiliers. When the military came to

51 *Amherstburg Echo*, ca. July 1880, Article 117.

54 Letter from the Historical Section, Army Headquarters, Ottawa, July 24, 1963, to the author.
Walkerville in 1895, they lacked suitable quarters, and a decision was made to erect a combined police station and armory which was completed in 1897. The resultant brick structure had the appearance of a miniature medieval castle of two stories. It was well furnished and each member of the Company enjoyed separate lockers for his equipment, while all the Company had use of the gymnasium in the building. Just as "D" Company might be proud of their quarters, Chief Griffiths had no longer any need to be ashamed of the new Walkerville "lock-up", and so two problems were solved simultaneously.

As a fledgling municipality, Walkerville periodically encountered additional problems of a more serious nature. One of the most difficult issues involved the relationship between the neighbouring municipalities of Windsor and Walkerville. Since Walkerville possessed no secondary school of her own, students who wished to supplement their elementary education were obliged to attend the Windsor High School. Until incorporation, Walkerville made no direct payments for the support of the Windsor institution, but contributed to it through the county grant. An amended financial agreement with the county accompanied the transition of unincorporated Walkerville.

village to town, but Walkerville councillors still believed
that the new agreement between the town and the county in-
cluded the payment to the Windsor High School for Walkerville
students in attendance. Consequently, when requested, the
Walkerville Council refused to reimburse the Windsor High
School for Walkerville scholars. By 1895 Windsor authori-
ties claimed that the upriver community was in arrears on
payments for academic services. But the Walkerville town
fathers stubbornly refused to acknowledge this debt, main-
taining that the annual county grant still covered the second-
ary school education of Walkerville pupils. When the Walker-
villians discovered that they were, in fact, responsible for
the payments in question, they argued that it was most un-
reasonable to support the high school financially and exercise
no voice in the administration of the institution. Walker-
ville demanded admittance into the high school district and
the privilege of electing a trustee. At length, however,
the Walkerville town fathers decided to assume the responsi-
bility of the Windsor Institute fees for pupils from Walker-
ville, subject to certain conditions:

Walkerville assumes the responsibility of the Wind-
sor High School fees, for Walkerville students pro
rata, who have graduated at the Walkerville Public

School and been regular and bonafide scholars there­of, a certificate from the Head Master to this effect to be furnished to each scholar desirous of attending the Windsor High School and the parents of such chil­dren being the supporters of our Public School and that each scholar shall procure a certificate of res­idenceship from the Town Clerk to be presented to the principal on his or her entering the High School and that costs of tuition of said pupils be provided for by assessment. 62

Even this plan caused some discontent as frequent discrepan­cies occurred in the number of certificates issued by the town clerk and the number of pupils in attendance at the high school. 63 The school question proved to be one of the most contentious problems between the two municipalities in the first decade of Walkerville's existence as a town.

In other matters, splendid co-operation existed be­tween the two neighbouring riverfront communities in the 1890's. Possibly the most prevalent danger in both munici­palities at the time was the spread of contagious diseases. In 1890 the Walkerville Public School was closed as a result of a scarlet fever epidemic 64 and had to be thoroughly cleaned and fumigated before it was re-opened to the students. 65 The following year a diphtheria outbreak caused the closing and disinfecting of the school again. 66 Typhoid 67 and black

67 Ibid., May 1, 1896, p. 5.
measles posed additional dangers to Walkerville and vicinity just before the turn of the century, and the possibility of an epidemic was always prevalent, a fact of which Walkervillians were undoubtedly aware. The upriver town lacked an isolation hospital but Windsor did maintain its own "pest-house" and in 1899 negotiations resulted in Walkerville receiving permission to send citizens suffering from a contagious disease to the Windsor Isolation Hospital. Although Walkerville was permitted to use the facilities without charge, the town assumed the expenses of its own patients, and disinfected the rooms following their recovery. This spirit of co-operation alleviated the possibility of a dangerous epidemic.

Some of Walkerville's problems were purely domestic in nature and involved no other municipality. The Grand Trunk Railway proved to be a persistent source of discontent to Walkerville people. The speed of the train through the village annoyed the inhabitants. The Second Street (Devonshire Road) crossing was believed to be dangerous to vehicles and pedestrians alike, and the citizens demanded

68 Ibid., January 9, 1891, p. 1.

70 Ibid., March 14, 1899, pp. 142-3.
71 Ibid., September 26, 1893, p. 82.
that a watchman be stationed there.\textsuperscript{72} After his advent however, he was frequently reprimanded for unsatisfactory performance of his duties. The "hideous noise" created by the prolonged shrill of the Grand Trunk trains disturbed the townspeople as well.\textsuperscript{73} Possibly the outstanding grievance between the railway company and the corporation centered about the timeworn wooden railway bridge which spanned the Grand Trunk tracks on Sandwich Street (Riverside Drive). For many years the town fathers attempted to rid the municipality of this "unsightly" structure and have it replaced by a level crossing but to no avail.\textsuperscript{74}

Although Walkerville was a rapidly developing industrial town in the 1890's, elements of ruralism were still prominent. In this respect, Walkerville residents had difficulties with stray animals in the neighbourhood. In the 1890's some of the townspeople owned sheep,\textsuperscript{75} or other types of livestock and on many occasions, these animals were killed by stray dogs and the municipal council was obliged to pay a portion of the losses.\textsuperscript{76} Not only were dogs bothersome but...
even stray horses and cattle\textsuperscript{77} proved a nuisance to residents of the town, especially in the Lincoln Road area\textsuperscript{78} which was only developed in the early nineties.\textsuperscript{79} The prevailing situation necessitated the existence of a town pound-keeper who was an important figure on the Walkerville scene. The initial pound-keeper in the town was appointed in 1893. His duties were to rid the municipality of such wandering nuisances as horses, cattle, sheep, goats, swine and geese. In the early years of incorporation, no public pound existed, and the pound-keeper was obliged to utilize his own facilities for the retention of the various animals. The holder of this position in the 1890's was required to possess a sense of justice as he might be asked to serve as ex officio magistrate in the pursuance of his daily tasks. In instances where irate householders brought animals to the pound which had damaged their properties, the pound-keeper was obliged to solicit the damages from the owner of the impounded animal before the latter was given its freedom. Should a dispute ensue over the extent of damages payable by the owner of the offending animal, the pound-keeper possessed the authority to summon a "court of three fence-viewers". One of the judges was chosen by the owner of the delinquent animal, a second by the party

\textsuperscript{77} Ibid., July 13, 1897, p. 13 and June 14, 1898, p. 90.

claiming damages, while the third arbiter was selected by the pound-keeper. The jury then retired to the scene of the destruction and assessed the amount payable according to the damages. This sum was then paid to the claimant. Since the post of pound-keeper was not a salaried job, his income was derived entirely from poundage fees. Should a horse be impounded, the keeper would be the recipient of fifty cents per day of confinement, similarly cattle were lodged at thirty cents, swine fifty cents, sheep and goats ten cents each, while geese were the least remunerative type of captive, netting the pound-keeper merely five cents daily. As the years passed the pound-keeper disappeared from the Walkerville scene. Yet, in his time, he must have been one of the hardest-working individuals in the town and was faced with many difficult tasks.

Walkerville was a relatively small town, but it was not a dull place, and holidays and special occasions were enthusiastically greeted by the citizenry which usually dressed the corporation in flags and bunting on Labor Days and Civic Holidays. A typical Civic Holiday might include a parade, athletic events, such as a ten mile bicycle race, a boat race or swimming meet, all rather simple but conceivably entertaining diversions.81

80 Town of Walkerville By-Law, No. 86, October 24, 1893.

81 Amherstburg Echo, July 21, 1893, p. 4, Article 111.
However in 1894, a gigantic celebration took place, the magnificence of which Walkerville had never witnessed previously and was unlikely to see again. The occasion was the opening of Hiram Walker and Sons' new office buildings on the riverfront on the north side of present-day Riverside Drive. On Thursday, October 20, 1894, the fine buildings erected at a cost of $100,000 were the scene of a gala celebration as hundreds of guests responded to the invitations issued by the Walkers. The visitors arrived from every corner of the United States and Canada and were met at the train by Mr. F. H. Walker and Mr. Robins, the treasurer of the distillery firm. Walkerville was attired in her best flags and bunting, and all day long the streets teemed with people. On arrival, the more distant guests were feted with a delectable luncheon in the Walkerville Music Hall, recently built, across the street from the new offices. The outstanding feature of the day's attractions was the reception in the new building from 2 to 6 p.m. Each guest was greeted by aging Hiram Walker, and his three sons, E. C. Walker, J. Harrington Walker and Franklin H. Walker, as they entered the interior of the structure. Inside was a dazzling spectacle of mosaic floors, marble columns and fine antique oak panelling. The four key members of the firm possessed private offices magnificently attired with antique furniture, marble fireplaces and fine paintings and reproductions. The general architectural style of the structure was Italian
Renaissance and features of some of Florence's finest architectural creations were incorporated into the Walker offices. Throughout the day, Chicago caterers provided the festive crowd with all types of tasty delicacies, while the tinkling mandolins of the Mandolin Club of Chicago entertained those present. Tours of the distillery were conducted, and those who desired took trips on the Walkers' trim steam yacht, the Pastime. At six in the afternoon, the invited visitors departed but the evening was retained for the employees and their families who received the same regal treatment as their predecessors earlier in the day.

The modern facilities contained a kitchen, serving room and lunch room, a gymnasium and barbershop and all of the splendid woodwork, including much of the exquisitely intricate carving, was done by the Globe Furniture Company of Walkerville. October 20, 1894, was possibly the most magnificent celebration that ever occurred in Walkerville, and probably lingered on in the minds of participants for some time. 82

82 The preceding description was derived from two sources: The Amherstburg Echo, September 28, 1894, p. 3, Article 118 and "A Commercial Palace", The Toronto Empire, October 13, 1894, pp. 1-4. The latter newspaper may be consulted in the Public Relations Office, Hiram Walker Gooderham & Worts, Walkerville, Ontario. Since excerpts from both articles are so intricately incorporated in the formation of the composite description above, the author finds it advisable to omit specific references and list the two sources which may be consulted readily by interested persons. The value judgements are not those of the author but are found in the articles themselves.
A less grandiose event in 1897, was the dedication of the Victoria Jubilee Fountain, which is presently (1964) located in Willistead Park. As early as 1893, the Walkerville Council lamented that the town did not possess a fountain. However the matter was repeatedly deferred until 1897, when it was decided that the erection of a suitable commemorative fountain should be the focal point of the town's proposed celebration of Queen Victoria's Diamond Jubilee. When the opinion of the Messrs. Walker was sought on the matter, these gentlemen believed that the $300 budgeted for the proposed fountain was inadequate and that a first-rate fountain should be the objective. They added that they wished to assume the financial burden of the memorial fountain themselves as a gift to the people of Walkerville. Accordingly, on June 22, 1897, Walkervillians, with the remainder of the British Empire, acknowledged Victoria's sixtieth year on the English throne. The festivities commenced with a parade led by the town councillors, and in succession, various Windsor dignitaries in carriages, the Walkerville Band, the Essex Fusiliers, the school children and the members of the Bicycle Club with their gaily decorated bicycles, while the Walkerville Fire Brigade brought up the rear. The parade was terminated at the site of the memorial fountain at the

83 Walkerville Council Minutes, June 13, 1893, p. 54.
84 Ibid., May 11, 1897, p. 477.
85 Ibid., May 25, 1897, p. 489.
corner of Assumption and Second (Devonshire Road) Streets. There, the assemblage watched as Mrs. Edward Chandler Walker laid the cornerstone for the fountain using a handsome silver trowel designed for the auspicious occasion. This act was followed by the customary oratory of the assembled dignitaries, and in this manner, the morning's celebration was concluded.

In contrast to this cheerful event of 1897, was the morning of January 12, 1899. On this Thursday morning, the founder of the Town of Walkerville passed away at his Detroit home. He had been in ill health for some four years following a paralytic stroke in 1895, and two additional seizures took place two days before his death. On the day after Hiram Walker's death, the Walkerville Council convened in a special session, at which time the town fathers drew up the following resolution of condolences:

The Mayor and Council of the Town of Walkerville having received the mournful news of the death of Mr. Hiram Walker the founder of the Town of Walkerville desire to place on record their appreciation of the great energy, enterprise, intelligence and beneficence displayed by Mr. Walker during his long and useful life which terminated at Detroit on January 12 A.D., 1899, and we express their sympathy with his sons and daughters and relatives in their bereavement. Signed at Walkerville this 13th day of January A.D. 1899.

87 Chauvin, Ch. XXXIX, pp. 2-3.
The funeral was held at Detroit, Michigan, on Saturday afternoon, January 14, at the late Mr. Walker's home, the interment being in Elmwood Cemetery. The pallbearers were all from Walkerville and employees of the Walker firm, the town officials attended the funeral in a body, while Rev. Mr. Battersby, rector of St. Mary's, Walkerville, was among the officiating clergy. In Walkerville, the day of the burial, the fire hall bell tolled a mournful dirge in recognition of the solemn occasion.

The passing of Hiram Walker, almost coincident as it was, with the end of a century, spelled the end of an era in the history of the Town of Walkerville.

89 Amherstburg Echo, January 20, 1899, p. 1, Article 8.

90 In the N. F. Morrison Private Collection. Interview with T. F. Crouchman, May 23, 1953, conducted personally by N. F. Morrison.
Until the middle eighties, Walkerville was scarcely more than a sleepy hamlet dominated by a large distillery. By 1890, the town began to stir discontentedly and had emerged from its torpid existence. Ten years later Walkerville had completely shed those drowsy characteristics to assume all the attributes of a thriving industrial town. In 1911 Walkerville's population was 3302, double that of 1901, and the metamorphosis was complete.¹ Probably the dominant characteristic of the period 1890 to 1910 was the influx of industries, but this interval was complemented by the arrival of several churches in the town.

In 1891, St. Mary's Anglican Church remained the sole place of worship, and except for the early 1870's, Methodists and other non-Anglicans were compelled to attend services in Windsor. Methodism returned to Walkerville in 1892, however, with the Reverend J. P. Rice as its determined standard bearer. Rice was one of those gifted clergymen whose primary task was the rescue of churches in distress and the development

¹Population, 1871-1941 (Ottawa: King's Printer, 1944), p. 100. The population for 1901 was 1595 compared with the 1911 figures of 3302.
Apprently Walkerville exhibited all the symptoms under which Reverend Rice thrived, and the latter strongly believed that a Methodist church should be re-established in Walkerville. In June, 1891, the London Conference was meeting in Windsor, and Rice appeared before this assemblage with arguments supporting the inauguration of a church enterprise in the upriver community. His plea was successful, and during the evening of June 9, 1891, the Lincoln Road Methodist enterprise received the sanction of the London Conference Committee. That same night, Reverend Rice procured a small book in which he recorded donations for his endeavour. On the flyleaf of this booklet, the following notation appeared:

Windsor, June 9th, 1891.
This certifies that Rev. J.P. Rice has the authority of the London Conference to canvas for aid in the erection of a church and parsonage in the Walkerville Mission. We most heartily commend the enterprise.

W.W. Edwards, Sec.  
B.C. Clement, Pres.

The authorization was completed with the seal of the London Conference of the Methodist Church. Prepared in this manner, with the subscription book, Rice began the solicitation of funds for the project. Among his contributors were two well-known evangelists of the time, Crossley and Hunter, and J. L. Hudson of Detroit, who contributed one hundred dollars to the fund. In his quest for financial assistance, Rice appealed to Hiram Walker. The town founder declined to contribute, maintaining that so long as St. Mary's was only half-filled on the Sabbath, there was no need for an additional church in the town. The distiller even refused to sell Rice a lot as a future site for the proposed church. Lincoln Road was just

6 Ibid.

7 Lincoln Road United Church Archives, Windsor. A Short History of Lincoln Road United Church, Windsor (Walkerville), Ontario (n.p. 1939), Book I, p. 3. Cited hereafter as A Short History of Lincoln Road United Church. Hiram Walker spoke the truth when he suggested that his church, St. Mary's, was only half-filled. In 1891 the average attendance was only 105 (Office of the Anglican Church of Canada, Diocese of Huron, Richmond Street, London, Ontario. Synod Journal, Diocese of Huron, 1889-1892, Parochial Reports as of April 30, 1891, p. 189). The seating of St. Mary's was 250 (Synod Journal, 1898-1901, Parochial Report for the year ending April 30, 1898, p. xlvi). Readers might wonder too, if Walker refused to sell Rice a lot in the town, how the church came to Walkerville. In 1890, Walkerville consisted of farm lots 94, 95 and 96 in the first concession, Township of Sandwich East. Walker's landholdings seem to have been almost entirely in lots 95 and 96, which in 1890 constituted the developed portion of town (Hiram Walker Historical Museum. C. E. Goad, Map of Walkerville, Ontario, December 1890, Sheets Three and Four). However lot 94 had been owned by the Chilver
a new subdivision in 1890 however, and not owned by Walker, and on this street Rice bought lots 118 and 119 from John Curry on June 16, 1891. The following month, on July 8, lot 120, at the southwest corner of Lincoln Road and Wyandotte Street was purchased as a site for the proposed church.

The contract for the construction of the parsonage was entered into September 4, 1891. The estimated cost was $1695 and the date of completion was scheduled for November 10 of the same year. In June, 1892, a contract was signed for the construction of the church, at an estimated cost of $6519 and this structure was dedicated November 20, 1892. Dr. Alexander Sutherland of Toronto, the General Missionary Secretary, preached at the morning and evening services and officiated

family (Hiram Walker Historical Museum, MacDonald Historical Collection, MS Wilkinson Papers, 20-235, Lot Ninety-Four). The westerly portion of lot 94 was sold in 1890 to a Windsor land syndicate which subdivided the purchase into Lincoln Road and Gladstone Avenue (Amherstburg Echo, April 4, 1890, p. 6). Thus Rice was not dealing with Walker when he bought the real estate. There is no doubt that Walker opposed the construction of the church (Rice to Robinson, October 4, 1943). Rice makes reference to the "intense opposition of Distiller Hiram Walker".

at the dedication. The church membership at the outset numbered only seventy-five. The first Sunday School in the new church was held January 15, 1893, with William Woollatt, the superintendent. This was the same individual who was associated with the Lake Erie and Detroit River Railway, and who was to remain superintendent of the church school for forty years. Mr. Woollatt also served at various intervals as choir leader, as a member of the building committee of the first church, and as quarterly official board member.

The Reverend J. P. Rice remained in Walkerville only six months after the opening of the Walkerville Methodist Church. Then he was summoned to the rescue of Alma College.

14 A Short History of Lincoln Road United Church, I, 3.

15 This information is located in the Lincoln Road United Church Archives, Windsor, on a sheet bearing the following title: "Lincoln Road United Church-Data from Year Books, Minute Books, Legal Documents, Etc. .. Above Data Assembled Without Adequate Double Check by W. J. Brownell, April 15, 1941". Cited hereafter as "Data .. April 15, 1941". Brownell at this time was evidently compiling a church history; his notes, his letters of enquiry to the various archives for information give evidence that he took the utmost care with his task. Where possible, the author of this thesis has checked Brownell with the original documents and found him to be most reliable.

which was experiencing financial difficulties.  

Under successive ministries, the church membership continued to increase. A decade after the opening of Lincoln Road Methodist Church, the membership had attained 130 under the guidance of the Reverend John H. Kirkland. On September 21, 1913, in the pastorate of the Reverend Harry T. Ferguson, the church mortgage was burned at the Harvest Home service. The congregation did not rest on their laurels however and only four months later, on January 6, 1914, a decision was made to build the present church. Probably the primary motive for this resolution was the growth in members and adherents to 516 in 1914, quite a contrast to the seventy-five charter members of twenty-two years previously. The new church was to stand three lot-widths south of the old structure, on a site consisting of lots 114, 116, 117 and part of lot 115. On September 19, 1914, the cornerstone of the new church was laid by Mr. Woollatt. The present Lincoln Road Church was opened September 12,

1915, still in the incumbency of Rev. Ferguson. The structure cost $42,065.59, although the amount was offset in part by the sale of the old church for $15,000.

In 1920, rumbles of expansion were again audible as the young people of the church sought some suitable accommodation for recreational purposes. This led to the formation of a committee to consider the feasibility of a church house. A solution was to be effected years later with the erection of the Woollatt Church House adjoining the present church. By 1922, the membership of the Lincoln Road Methodist Church was 959 and under the spiritual leadership of the Reverend E. A. Pearson, the church founded three decades previously by a Ruthven clergyman, continued to promote the cause of Methodism in Walkerville.

Anglicans at the turn of the century still attended the church on Sandwich Street (Riverside Drive) built by Hiram Walker in 1870. In 1902, a number of factors seemed

to indicate the desirability of a new structure for the parishioners. The proximity of the church to the Grand Trunk Railway led to frequent interruptions during the services. The church lacked a chancel and a vestry, both of which were deemed necessities. The Ladies Aid Society, sixty in number, was hampered by inadequate facilities for bazaars, or a meeting place.\textsuperscript{33} The church basement which housed the eleven Sunday School classes consisting of 115 pupils\textsuperscript{34} was too small to properly accommodate the scholars. Damp conditions prevailed in the basement too, which provided anything but a healthy atmosphere.\textsuperscript{35} Although the church seated 250 worshippers, and average attendance was ninety, 280 parishioners were on the rolls,\textsuperscript{36} and this constituted a problem on festivals or special occasions, when there was insufficient accommodation.\textsuperscript{37}

As soon as the sons of the late Hiram Walker learned of the difficulties and plans of the parishioners, they offered to erect a new church, rectory, and Sunday School, to the memory of their parents in the southern portion of the town.

and plans to this end began at once. The Walker sons inherited their father's tradition of exercising the utmost care in any enterprise undertaken, and a renowned firm of church architects, Cram, Goodhue and Ferguson of Boston and New York, prepared the blueprints for the ecclesiastical structure. The cornerstone was laid by the Right Reverend Maurice S. Baldwin, D.D., Lord Bishop of Huron, on Monday, May 25, 1903, at 2:30 p.m. The church was consecrated by Bishop Baldwin on Sunday, April 10, 1904. The Walkers not only provided for the building of the church but donated an organ, communion service, font, church and choir vestments, hymnbooks for choir and congregation, a library for the Sunday School, ranges in the school house and rectory, and all the cooking utensils and linens required for banquets or other types of entertainment. An endowment fund of $25,000 was established by the Walkers, the income derived to be utilized for insurance and repair of the buildings and the grounds, and the provision of musical services for the church. In the deed of gift arrangements were set down for the church

A plan was formulated whereby an endowment was to be established through the sale of cemetery lots, and in part was to constitute a Free Grave Endowment Fund to provide a final resting place for the poor parishioners of the church. Over the years, St. Mary's has remained one of the outstanding attractions in old Walkerville. The sylvan setting and placid environs convey to the structure a sense of solemn dignity. It is not difficult to imagine that St. Mary's ivy-mantled tower and adjacent graveyard might have inspired Gray's *Elegy Written In a Country Churchyard*. Although St. Mary's constitutes one of the loveliest areas in the former Town of Walkerville, her exterior beauty is rivalled by the excellent interior furnishings.

Prominent in the construction of the church was Bertram Goodhue, of the firm of ecclesiastical architects, Cram, Goodhue and Ferguson of Boston and New York. Goodhue was a designer of remarkable ability, who was responsible for the design of the four choir stalls in the chancel of St. Mary's Church. Following his death, these works of religious art were sought by the Smithsonian Institute of Washington, D.C., as an example of his talent. The parish book-plate also

44 Daniels, p. 14.

designed by Goodhue was requested by the Congressional Library in the American capital as an addition to its collection, but the original was retained by the Walkerville parish.46

During the initial year of services in the new church with a seating capacity of 250,47 the rolls listed 330 members while the average Sunday School attendance was one hundred.48

Like the other churches, St. Mary's sponsored a variety of weekday activities for the ladies, men and children of the parish. Possibly the most unique among these groups was the First Walkerville Company, Boys' Brigade. This was organized in 1901, the objects being to further Christian ideals among the boys of the church, and to instill in them a respect for obedience and discipline. The company was comprised of officers and men, the former usually adult members of the congregation. The brigade participated in parades on festive occasions and the activities of the company included the formation of a band. The brigade possessed its own colours and in the summer attended camp.49 The movement won such acclaim throughout the town, that several among the citizenry voiced the hope that all the youth of the town might participate in the movement. The result was the formation of the Walkerville

Cadets, an entity distinct from the Boys' Brigade of St. Mary's Church. Several of the key officers in the church brigade were asked to contribute their services to the wider town movement, the result being that the Cadets soon assimilated the Boys' Brigade and the latter group ceased to exist in 1904.\(^50\)

In 1914, a decade after the construction of the present church, the membership totalled 650 members, although the church remained only half full with an average attendance of 125 parishioners each Sunday.\(^51\) The Sunday School continued to flourish with 224 scholars, and an average attendance of 131 each Sunday.\(^52\) After the end of the First World War, the parish underwent a substantial growth. The roll in 1920 showed a membership of twelve hundred souls, although the active adherents remained about 120.\(^53\) By 1918, the average Sunday School attendance had climbed to 210 each Sunday, which gave rise to much congestion in the latter area of church activity.\(^54\)

It seemed imperative that additional space be obtained and for this reason, a site was acquired in 1919 on Devonshire Court for erection of a new Sunday School addition. In the process of construction of the Memorial Hall, as the structure was to

be known, in commemoration of those parishioners who had served in the Great War, it was felt that the building might serve as a church for the residents in the immediate district in addition to its original purpose.\(^{55}\) By 1922, then, Anglicans were able to attend either St. Mary's Church built in 1904 or the recently constructed St. Mary's Memorial Hall on Devonshire Court.\(^{56}\) The membership in the older St. Mary's diminished from twelve hundred to 560,\(^{57}\) the difference presumably being in the numbers that joined the new congregation. In the erection of St. Mary's, the Walker sons had continued the family tradition of providing for the spiritual well-being of the inhabitants of the town founded by their father.

Presbyterianism was one of the earliest religions to appear on the Walkerville scene, but it was not until the first decade of the twentieth century, that it became solidly entrenched in the town. Possibly as early as 1884, the Presbyterian Church in Windsor held Sunday afternoon services in the new music hall owned by the Walkers who permitted its use for such meetings.\(^{58}\) In the summer of 1891 consideration

was given to the development of a mission Sabbath School in the vicinity of Walkerville. 59 No action was taken in this respect however, until November of 1907, with the inauguration of a branch Sunday School in Walkerville located in the Forester's Hall, on Victoria Road (Chilver Road) near Wyandotte Street. 60 In the same month, an organization meeting was convened in St. Andrew's Church in Windsor, at which time much enthusiasm was generated for the creation of a Walkerville congregation. 61 With a view to such an end, an invitation was extended to Reverend Joseph Watt of Harrow, to hold church services in the Forester's Hall. 62 Watt proved receptive to the idea and services were begun in the latter building under the sponsorship of St. Andrew's Presbyterian Church in neighbouring Windsor. 63

In August 1907, the organization of a church building committee took place, the most prominent committee man being Gordon M. McGregor, the president of the three year old Canadian Ford Company Limited. By January 1908, a site was acquired at the north-west corner of Windermere Road and

Niagara Street, and in March, construction got underway.\textsuperscript{64} The building progressed favorably and on the morning of May 25, 1908, the Honourable M. L. Sutherland, M.P. for North Essex, officiated at the laying of the cornerstone.\textsuperscript{65} The Walkerville First Presbyterian Church was opened November 12, 1908.\textsuperscript{66} The basement was left unfinished in an attempt to economize, but the cost of the church and hall was $14,474\textsuperscript{67} with the pews installed by the Globe Furniture Company of Walkerville, an additional $1150.\textsuperscript{68}

Meanwhile the supporters of the infant church were active in the organization of a congregation. At the inaugural meeting of the session of the new church, January 2, 1908, John Lorne and H. Johnston were appointed elders. The extensive districts assigned to the two men indicated that the members and adherents were few in number and scattered about the town. Elder Lorne was to administer to all members from Cataraqui Street, south to the Tecumseh Road. Those in the congregation residing between the river and Cataraqui

Street were the responsibility of Elder Johnston. On January 26, 1908, the new congregation held its first communion in the Foresters' Hall with the entire church membership of ninety-six present.

Although a separate congregation, the Walkerville First Presbyterian Church retained its close association with the mother church, St. Andrews, Windsor, whose session was appointed by the presbytery to serve as the overseers of the youthful enterprise. In February, 1909, a decision was made to secure a full-time minister for the church and a call was sent to the Reverend Peter Taylor who responded favorably. Reverend Taylor was a native of Hamilton, Ontario. His theological training was taken at Knox College, and at the time of the Walkerville summons, he was assistant registrar at the University of Toronto.

On his advent, Reverend Taylor found a flourishing Sunday School, an Adult Bible Class, a Ladies Aid Group, whose endeavours had paid for the installation of the seating in the church, a Girls Aid Society and a Mens Social Club. Attendance figures proved encouraging with the number of

members and adherents showing an increase to 127, over the original charter membership of ninety-six.74 After an incumbency of seven years, Mr. Taylor resigned in October, 1916,75 and took with him the best wishes of the congregation.76 On his departure, the rolls disclosed a membership of 269 members.77 A number of additional church groups were established during Mr. Taylor's pastorate and the relationship between minister and congregation proved most fruitful. Mr. Taylor's successor was the Reverend M. Gordon Melvin of New Westminster, British Columbia.78 An ardent scholar, and a native of Ontario, Rev. Melvin had passed eight years of his ministry on the west coast before he came to Walkerville where he was to serve for a period of nine years.79

The change in ministries occurred during the Great War, and in their small way, the congregation of the First Presbyterian Church, Walkerville, lent their support to the overseas effort. In 1914, three organ recitals, featuring soloists and the choir were held in support of the Walkerville Patriotic Relief Fund.80 Congregational letters were

dispatched to the men at the front, in order that they would not feel entirely forsaken on a foreign battlefield.\footnote{Ibid., October 30, 1917, p. 107.}

By 1917, the membership of the Sunday School had attained such proportions\footnote{Ibid., Report of the Session for 1917, p. 113.} that an expansion of facilities was necessary. It was determined that the most feasible remedy would be the completion of the basement beneath the church, which would permit the accommodation of additional classrooms. After congregational approval, the work was undertaken.\footnote{Ibid., March 4, 1918, p. 120 and April 21, 1918, p. 121.} The project was completed in January of 1919, with dedication of the facilities on January 23, 1919.\footnote{Ibid., January 9, 1919, p. 131.}

In the same year, the Reverend Melvin explained that a number of Protestants were residents in the adjacent Town of Ford, where no services were available to them. He believed that a Sunday School should be established there for the accommodation of the youngsters.\footnote{Ibid., February 2, 1919, p. 137.} This was done in February, 1919.\footnote{Ibid., March 2, 1919, p. 137.} Almost simultaneous with the establishment of the Presbyterian enterprise, the Methodist and Anglican churches of Walkerville started missions in Ford.\footnote{Ibid., March 4, 1919, p. 138.} The field was
unable to support three Protestant churches, however, and the Presbyterians withdrew after several months, resigning the field to the other two denominations.88

The post-war years constituted a period of rapid population growth in Walkerville and in 1921, the inhabitants of the town numbered 7,059.89 This increase was reflected in the membership of the First Presbyterian Church of Walkerville which had attained a membership of 708 souls, a marked contrast to the charter membership of ninety-six, fourteen years previously.90

No additional Protestant churches appeared in Walkerville until 1919, when a Baptist Church, with the Reverend H. McDiarmid, pastor, was located on the southwest corner of Windermere Road and Cataraqui Street.91

Catholics fell behind their Protestant counterparts in the erection of churches in Walkerville. Until 1884, Roman Catholics were obliged to attend mass either at St. Alphonsus or Assumption Churches. Bishop Walsh of the London Diocese realized that prospective parishioners in the Walkerville confines of the Diocese should be provided with

88Ibid., October 3, 1919, p. 143.
89Population, 1871-1941, p. 100.
90Session Minutes of Walkerville First Presbyterian Church, Report of Session for 1922, p. 191.
additional church accommodation and after several visits to the area, His Excellency decided that the most suitable site for a church would be in the immediate vicinity of Walkerville. Acquainted with the fund-raising capabilities of the Rev. James Theodore Wagner, who had amassed the required monies for the building of St. Alphonsus Church, Bishop Walsh put the former in charge of gathering funds for the new enterprise just above Walkerville. Among the benefactors was Hiram Walker, who purportedly had offered St. Mary's Church to the London Diocese earlier, in the hope that Angli cans and Catholics might share the facilities, but the response of the Diocese was negative. Success attended the efforts of Wagner and in March 1884, the first sod was turned. Two months later, a large number of people witnessed the laying of the cornerstone. On November 3, 1884, Bishop Walsh officiated at the dedication ceremonies of the completed ecclesiastical structure which cost $12,745. The red brick church, just above Walkerville on the river road, possessed

dimensions of ninety by forty-five feet with a seating capacity for five hundred parishoners. The interior of the structure was finished with maple flooring, pews of black ash, and an elegantly fashioned marble altar over which stood a statue of Our Lady of Lake St. Claire after whom the church was named. This edifice was destroyed by fire in March of 1907. The present church, Our Lady of the Rosary was constructed immediately following the destruction of its predecessor, being completed in 1908 at a cost of $55,000. It was larger than the original structure. St. Anne's Church on Huron Street (Richmond Street) at Devonshire Road, the cornerstone of which was laid in November 1912, was the initial Catholic parish within the Walkerville boundaries.

Possibly the most impressive landmark of Walkerville is the commodious Tudor-style mansion, complete with courtyard, stables and gatehouse known as "Willistead". This large residence was constructed during the two years 1904-1906, by Edward C. Walker, the eldest son of the late Hiram Walker. The stately mansion was set in the midst of a 15 1/2 acre park and derived its name from that of E. C. Walker's brother Willis, a Detroit notary, who died in 1886. The E. C. Walkers

102 The Church Cornerstone Cites the Date as November 17, 1912.
moved into Willistead in January 1906, from "the Cottage" to which Hiram Walker had brought his family originally in 1859 at the outset of his enterprise. The latter soon fell a victim to the wrecker's hammer after E. C. Walker moved to his new home. 103

The exterior woodwork of Willistead was the artistry of imported Bohemian craftsmen. The eavestroughs are of hand-wrought copper. The stone used in the buildings was quarried at nearby Amherstburg. At the building site it was carefully cut by Scottish stonemasons brought to Canada for this task. 104

The interior of the Walker mansion was quite as impressive as the exterior, due in part to the attractive paneling and intricate wood-working capabilities of the Globe Furniture Company of Walkerville. 105 The first floor of the tri-storey structure housed: E. C. Walker's library, a morning room, a large billiard room, the great hall, a drawing room and conservatory, a dining room and several servants' rooms. Nearly all the larger rooms were dominated by impressive hearths with intricately carved mantels. The wide staircase leading to the second floor was a most exquisite example of artistry in wood. The two upper floors were devoted to bed-

105 Daniels, Re-Willistead, Residence of the Late Edward Chandler Walker.
rooms for the Walkers, their personal valets, and guests. The third floor contained additional guest rooms and storage rooms.106

Evidently, Mrs. E. C. Walker preferred shrubs to flowers and the former type of plant life, with trees, surrounded the property to provide a degree of privacy. The Walkers lived an aristocratic life. Locally, they travelled in a large two-seated phaeton with footmen at the front107 and their Elizabethan-style mansion was the scene of entertainments on a lavish scale.108

On the south side of the main residence, the lengthy promenade extending to present-day Richmond Street was painted green, while the Walkers were in residence. It was sheltered by an arch of catalpa trees, a flowering variety, which must have proven extremely attractive at certain seasons of the year.109 The impressive wrought-iron fence around the property was erected in 1914 and 1915 by a Detroit firm.110

110 Daniels, Re-Willistead, Residence of the Late Edward Chandler Walker.
Willistead has retained the dignity of bygone years and this imposing mansion, and nearby St. Mary's Church, both sheltered in sylvan solitude represent a touch of old England in old Walkerville.

In 1904 a cultural outlet appeared in Walkerville with the advent of a town library. Previously residents of the upriver community enjoyed the privileges of the Windsor Public Library which opened on Ferry Street on December 6, 1894. At its inception, the Windsor Library Board of Management invited Walkerville to join with it, and since local petitions supported the idea of a library in the town, the Walkerville Council deemed it appropriate to accept the invitation of the Windsorites. Consequently, as of April 1, 1896, Walkerville citizens were permitted access to the holdings of the Windsor library which consisted of 5943 volumes and some sixty newspapers and periodicals. In return

113 Ibid., p. 5.

116 Ibid., p. 4.
for this privilege, $175 annually was paid to the Windsor authorities.\textsuperscript{117} Full membership in the Windsor institution provided an opportunity for Walkervillians to attend the literary evenings sponsored by the library\textsuperscript{118} which were designed to foster a more critical attitude toward literary works. Periodically such evenings were held in the Walkerville Music Hall.\textsuperscript{119} In 1900 the Walkerville grant to the Windsor library was increased to $200 annually,\textsuperscript{120} and by 1902 it was raised once more to $250 per annum.\textsuperscript{121} It would seem that Walkervillians failed to utilize their privileges to the utmost as only eighty-five applied for cards in 1897.\textsuperscript{122} The absence of figures for the ensuing years makes it impossible to determine if this remained a true indication of patronage from Walkerville.

\textsuperscript{117}Windsor City Hall Vault, Second Floor, Clerk's Office. Town of Walkerville By-Law, No. 120, March 10, 1896. In the preamble the sum is quoted as $175, but in the by-law proper $170 is given. However the former figure is correct. For verification, see Second Annual Report of Windsor Public Library, 1896, p. 7.

\textsuperscript{121}Eighth Annual Report for Windsor Public Library for year 1902, p. 8. It is true that Walkerville did pay $200 in 1898, but this was under special circumstances. See Fourth Annual Report for Windsor Public Library for year 1898, pp. 6-7.

\textsuperscript{122}Walkerville Council Minutes, January 12, 1897, p. 423.
On Friday, October 16, 1903, the present Victoria Avenue branch of the Windsor Public Library was opened, a gift of Andrew Carnegie. The modern new facilities did not benefit Walkerville residents for long however, since the following summer the town established its own library and terminated the nine year agreement with the neighbouring Windsor establishment. Probably the citizens of the upriver town were wearying of the trolley trip to Windsor, and then too, Walkerville was increasing in stature and was able to undertake the maintenance of her own library facilities.

The first recorded meeting of the Walkerville Library Board took place June 16, 1904, at which time consideration was given to the proposed location of the new library. While the latter decision was pending, Board members visited libraries in Windsor, Stratford, London and Toronto to ascertain the methods prevailing in these established institutions. In January, 1905, Mr. John Edgecombe became the town's initial

126 Ibid., July 4, 1904, p. 3.
Two months later preparations were completed and the library was opened in the second floor of the Walkerville Music Hall on Sandwich Street (Riverside Drive). The facilities were to be open Tuesdays, Thursdays and Saturday afternoons from 3-6 p.m., and Saturday evenings from 7-9 p.m. The holdings of the new institution numbered only 414 volumes, so borrowers were limited to a single book which might be retained a fortnight. Scarcely was the library settled, when it was moved into a house on the northwest corner of Kildare Road and Wyandotte Street, its first home scheduled to be razed. Inhabitants of the town received the library enthusiastically and the membership totalled 360 borrowers at the end of the first full year of operation. In 1907 the library changed its location to rooms in the new Strathcona Block on the north-west corner of Wyandotte and Devonshire Road. It occupied a portion of the second floor.

there until 1922.\textsuperscript{134}

Viewed from a contemporary standpoint, the Walkerville Library occasionally encountered vexing problems. In 1918 a diptheria epidemic forced the closing of the building to alleviate the possibility of the spread of the dread disease via the circulation of books.\textsuperscript{135} In addition, 125 to 130 volumes had to be destroyed after they had been in homes under quarantine.\textsuperscript{136} In this manner the public safety was assured although the destruction of the books must have been accompanied by much misgiving.

In 1919, Miss Marcella Frebault, a graduate of the provincial library school inaugurated trained library service in the town.\textsuperscript{137} By the following year library membership was 1,419, holdings totalled 9,878 volumes and 46,802 books circulated annually.\textsuperscript{138} A fine selection of newspapers and periodicals was available too, including: the \textit{Victoria Colonist}, the \textit{Regina Leader}, \textit{Illustrated London News} and \textit{Toronto Saturday Night}.\textsuperscript{139} Numerous donations were made to the library

\end{itemize}
by the townspeople and the generosity of the E. C. Walkers was evident on many occasions. In 1920, an honours graduate of Queen's University and the Ontario Library School, Miss Anne Hume, succeeded to the post of town librarian. Two years later, on April 8, 1922, the Walkerville Library moved from the Strathcona Block to Willistead where it remains today.

Until 1905, the fine brick elementary school at the south-west corner of Devonshire Road and Wyandotte Street, constructed in 1886, remained the sole institution of learning in the village. However two new schools replaced the older edifice in 1905.

Catholic scholars in Walkerville had never enjoyed the privileges of a separate school in their town and by 1903, approximately 120 of them attended the separate school affiliated with the Church of Our Lady of Lake St. Clair in neighbouring Sandwich East. About the turn of the century, this arrangement proved to be a source of difficulty as Catholic parents sought to divert payment of their school taxes from Walkerville to support their own institution in

The Walkerville town fathers were not entirely disposed to grant such a dispensation and moreover claimed that they had no legal power to do so. For a time, the issue was before the courts, but the decision rendered was unfavorable to the Catholics. In view of the unsuccessful litigation, the Reverend Fr. Beaudouin, parish priest of Our Lady of Lake St. Clair, determined to erect a separate school in Walkerville which town Catholics could legally support through taxation. He was successful in this endeavour and by September 1905, St. Edward's separate school on the east side of Monmouth Road, immediately south of Huron Street (Richmond Street) opened its doors.

In the same year, a new public school was erected on a site occupying the block bounded by Victoria Road (Chilver Road), Windermere Road, Cataraqui and Niagara Streets. H. A. Beaton was the first principal of the institution.

150 Ibid.
years later, in 1914, the progressive community required an additional public school and King George School was constructed on Ottawa Street between Windermere and Kildare Roads.\textsuperscript{151} The town still lacked secondary school facilities, and Walkerville high school students were obliged to attend the Windsor Collegiate Institute.

In the 1870's and 1880's Walkervillians were inclined to seek entertainment in the neighbouring municipalities of Windsor and Detroit. By the 1890's and 1900 Walkerville possessed sufficient activities to keep its populace at home. Possibly the outstanding social organization in the town was the Tecumseh Boat Club organized in 1889. In that year a number of local rowing enthusiasts purchased the house of the Detroit Boat Club which was brought across the river and placed about one hundred yards below the Walkerville ferry dock at the foot of present-day Devonshire Road.\textsuperscript{152} The club participated in numerous regattas against various American and Canadian societies.\textsuperscript{153} Local Walkerville regattas were held on holidays, when club members vied for prizes donated sometimes by the Messrs. Walker,\textsuperscript{154} who were prominent in

club affairs. This was particularly true of Edward C. Walker who for some time was president of the organization.\textsuperscript{155} The members were the proud owners of a luxurious ten-oared barge donated by F. H. Walker in 1891.\textsuperscript{156} This craft, christened the "Ella" after Mr. Walker's daughter, was lavishly cushioned and carpeted and could accommodate thirty-five passengers.\textsuperscript{157} Thrice weekly, the "Ella" might be seen churning through the waters of the Detroit River with her complement of club members.\textsuperscript{158} The Tecumseh Boat Club engaged in recreations other than boating. Annually, moonlight excursions complete with orchestra took place on the steamer "Sappho";\textsuperscript{159} monthly dances were held in the clubhouse in the summer,\textsuperscript{160} and in the Walkerville Music Hall in the cold winter months.\textsuperscript{161} The club possessed a bowling alley,\textsuperscript{162} with the Walkerville Fire Department, veteran bowlers, providing opposition for club members.\textsuperscript{163} In 1896 two tennis

courts were added to the club's facilities, and the organization must have assumed a nature similar to contemporary country clubs. 164

The Walkerville Bicycle Club founded in the early 1890's 165 played a prominent role in local social life as well. Bicycling seemed to achieve considerable popularity at this time and in Essex County, clubs were formed in small towns such as Essex, Kingsville 166 and Leamington. 167 Periodically, wheelmen from various areas would congregate for a meet under the banner of the Canadian Wheelman's Association for substantial cash prizes. 168 The colours of the Walkerville fraternity were red, white and blue 169 and the club membership usually hovered in the vicinity of fifty 170 to sixty enthusiasts, 171 although it could approach one hundred. 172 Two clubs existed, one for the junior, 173 another for the senior members of the community. Club activities consisted primarily of bicycle

races. The seniors competed over a ten and three-quarter mile course, four miles longer than the junior distance of six and three-quarter miles. 

Cricket, baseball and football provided alternative amusements for Walkervillians at the turn of the century, as did the gun club and the Walkerville Horticultural Society. Bowling, fostered by the Walkers since the 1870's, remained a community pastime. In most of these organizations, E. C. Walker held honorary posts, an indication of his prominence and popularity in town affairs.

For this reason, it must have been a saddened populace which learned of Edward Chandler Walker's death on March 11, 1915, while visiting his sister-in-law in Washington, D.C.

182 Supra, see footnotes 176-181. These provide sufficient evidence of this statement.
The eldest surviving son of the late Hiram Walker had experienced poor health for some time, even to the point of wheelchair invalidism. Yet his passing was entirely unanticipated. Mr. Walker was a sometimes aristocrat, although this trait did not remove him from the people of the town. He enjoyed horses and riding and kept a number of them in his splendidly attired stable. He was a world traveller and considerable time was spent with his wife collecting art treasures in various parts of the globe to hang in his Walkerville mansion. Naturally, Walker's frequent absences from the town lessened his local influence, although in the years immediately after incorporation he represented his father ably in the municipality.

In his twilight years, possibly as a result of his declining health, Walker grew less energetic and became somewhat of a recluse. Yet Mr. Walker had known the acclaim of the townspeople and at least once found the town decked in flags and bunting on his return from some distant land. The death of E. C. Walker witnessed the passing of a considerable portion of the family's influence from Walkerville.

184 Walkerville Council Minutes, February 13, 1894, p. 123; February 26, 1895, p. 211; April 9, 1895, p. 224; April 28, 1896, p. 344.
185 The Windsor Evening Record, March 11, pp. 1,3; Interview with Mrs. C. S. King, personally conducted by N. F. Morrison, November 19, 1955.
186 Amherstburg Echo, April 23, 1897, p. 5.
Sixty-four years after Hiram Walker started his distillery enterprise in the Township of Sandwich East, Walkerville attained her territorial maturity. On the order of the Ontario Railway and Municipal Board, dated June 5, 1920, parts of farm lots 92, 93, 94, 95, 96, 97 and 98 in the second concession of the Township of Sandwich East lying north of the Canadian Pacific Railway were to be annexed to the Town of Walkerville as of June 15, 1920.¹ Such an extension would have provided Walkerville with an additional 540 and 1/10 acres of land, which Walker and Sons, Ltd., ² and others, such as Major Howard E. Blood, general manager of the Canadian Food Products Limited, a subsidiary of General Motors Corporation, claimed was essential for the development of homesites for area industrial workers.³ It was true that Walkerville was experiencing a rapid increase in population which had

¹The Ontario Gazette, LIII, No. 45 (November 6, 1920), 2208-9.
²Ibid., p. 2208.
doubled from 3,302 in 1911 to 7,059 in 1921. This characteristic was shared by the other Border municipalities. Sandwich and Windsor population figures had doubled too, while the absence of previous census reports for the City of East Windsor allow of no comparison. The City of Windsor appealed the decision of the Railway and Municipal Board claiming that the annexation of parts of lots 92 and 93 by Walkerville would interrupt Windsor's own development. This grievance resulted in an Order-In-Council dated August 20, 1920, which denied Walkerville the right to annex lots 92 and 93, but verified an extension of the Walkerville boundaries with the inclusion of lots 94, 95, 96, 97 and 98 in the second concession of the Township of Sandwich East. It was not until April 26, 1922, that the agreement between the Township of Sandwich East and Walkerville pertaining to the ultimate disposition of the assets and liabilities of Sandwich East was ratified by the Walkerville Council. Thus legally and officially Walkerville attained her ultimate territorial extent on April 26, 1922.

6The Ontario Gazette, LIII, No. 45 (November 6, 1920), 2209.
7Windsor City Hall Vault, Second Floor, Clerk's Office. Town of Walkerville By-Law, No. 914, April 26, 1922.
The territorial development of Walkerville seems to commence in 1884 when the southerly limit of the town was Tuscarora Street. The latter street marked the southerly extent of Walker Road, Fourth and Third Streets. Second Street terminated at Brant Street and this constituted the street development in Walkerville in 1884.\(^8\)

Six years later in 1890, the southernmost limits of the town still failed to extend south of Tuscarora Street, save the Walker Road which extended well beyond the then southerly limits of the town. However Walkerville was expanding westward from its south-easterly nucleus at the distillery and three additional streets were laid out in the interim between 1884 and 1890.\(^9\) There was some development of First Street to Wyandotte Street; Susan Avenue (sometimes known as Victoria) was the scene of scattered dwellings southerly to Assumption Street, and extended to Brant Street.\(^10\) Lincoln Road came into being in the spring of 1890, at which time a Windsor syndicate purchased a portion of farm lot ninety-four and began a new subdivision.\(^11\) This street had little settlement on it in 1890 however. Already the location of several

industrial enterprises immediately west of the Lake Erie and Detroit River Railway were portents of the future industrial complex that was to line the Walker Road in ensuing years.\(^\text{12}\)

At the north-west corner of the Tecumseh and Walker Roads stood the cattle barns,\(^\text{13}\) which were previously located on the riverfront adjacent to the distillery.

By 1900, the Walker Road was extended to the vicinity of Niagara Street; Fourth, Third, Second and First Streets possessed a common termination point at Cataraqui Street; Susan Avenue stopped at Assumption Street; while Lincoln Road had experienced little development over the past decade,\(^\text{14}\) but for a few scattered residences. In the ten year period 1890 to 1900, an innovation was brought to Walkerville as house numbering was introduced in 1894.\(^\text{15}\) Previously a commercial establishment or private dwelling was designated by its relation to some well-known landmark or street, such as

---

\(^{12}\)Goad, Map of Walkerville, Ontario, December 1890, Sheets Three and Four.

\(^{13}\)Ibid., Sheet Four.

\(^{14}\)The author has reached the conclusion above through consultation of the following Paving By-Laws of the Town of Walkerville: By-Law 34, July 14, 1891; By-Law 40, October 27, 1891; By-Law 62, May 25, 1892; By-Law 80, July 11, 1893; By-Law 152, August 10, 1897. Further verification which would indicate the above approximation of the street development is correct is found in the street watering by-law. I think it is only reasonable to assume that unless some settlement existed along the streets they would not have been watered regularly which they were (Town of Walkerville By-Law, No. 217, June 11, 1901).

\(^{15}\)Town of Walkerville By-Law, No. 100, October 9, 1894.
"north side Sandwich, east end Walkerville". However to contemporary urbanites, the numbering system would seem somewhat unique. Each house was assigned a "key number", and for any successive additions to that structure, a fraction would be added to the original number. Thus a house with an original street number of 9, might undergo subsequent additions which would necessitate a later house number such as 9 1/4, 9 1/2 or 9 3/4 depending on the frequency of additions over the years.

In the fall of 1902, a new street was subdivided south from Assumption Street. The new thoroughfare, Garfield, was located in farm lot ninety-four, and began to fill the void between Susan Avenue (Victoria) and Lincoln Roads. Two years later, this street, with the other north-south arteries in Walkerville underwent a change of name. This action was more in accord with the attractive appearance of Walkerville residential streets, which were beautifully lined with trees and merited names commensurate with their appearance.

17Town of Walkerville By-Law, No. 100, October 9, 1894.

18Windsor City Hall Vault, MS Minutes of the Walkerville Town Council, October 14, 1902, p. 375. Cited hereafter as Walkerville Council Minutes.

19This seems to be the most probable reason for the change in name. In 1903 the Mayor, as one of the points in his inaugural address made reference to the names of those
Consequently, on November 8, 1904, the following changes were made in the Walkerville street-names: Lincoln Avenue became Lincoln Road; Garfield Avenue became Windermere Road; Victoria Avenue became Victoria Road; First Street became Kildare Road; Second Street became Devonshire Road; Third Street became Argyle Road; Fourth Street became Monmouth Road; and Fifth Street became Walker Road.20

The period 1900 to 1910 was one of considerable expansion. The eastern portion of the town led the remainder and by 1910, the Walker Road has been extended south to the Essex Terminal Railway, with Monmouth Road terminating at Ottawa Street which merely traversed that distance between Walker and Monmouth Roads. Argyle, Kildare, Windermere and Lincoln Roads terminated at Niagara Street, while Victoria streets running north and south as "inappropriate" (Walkerville Council Minutes, January 13, 1903, p. 385). In the author's conversation with N. F. Morrison, local historian, the latter expressed the belief that it was through the wishes of Mrs. E. C. Walker that the street names were changed - since they failed to comply with the fine appearance of the Walkerville streets. This belief takes on additional significance since it was the Walkerville Land and Building Company, of which E. C. Walker was president, that petitioned for the passage of the by-law which would change the street names. (Town of Walkerville By-Law, No. 287, November 8, 1904). That the streets were well-kept and tree-lined is certain and mention is made of the trees often in the council minutes. Furthermore numerous photos are available of Walkerville's handsome tree-lined streets (In the Private Collection of N. F. Morrison. H. W. Gardner (comp.), Walkerville Ontario, Canada, 1913, Including Windsor, Ford, Sandwich and Ojibway (Windsor: The Evening Record, 1913).  

20 Town of Walkerville By-Law, No. 287, November 8, 1904.
Road extended to Huron Street and Devonshire Road stopped at Ontario Street.  

This decade witnessed the inauguration of new types of sidewalk and street construction. At incorporation, most of the Walkerville streets appear to have been covered with gravel. Shortly after Walkerville achieved town status however, cedar block pavements were introduced. Cedar logs were sawn into blocks of approximately nine inches in length, after which the surface soil was removed from the streets and the blocks were placed on a foundation of sand, cobblestone, or later, concrete. The openings between the blocks were then filled with sand, and the result was an excellent surface of a few year's duration, after which the inevitable wear and decay produced an impossibly uneven surface which could be remedied only through repaving. In summer, the

21 This approximation is based on the following Town of Walkerville By-Laws: By-Law 301, December 27, 1904; By-Law 346, June 11, 1907; By-Law 349, August 13, 1907; By-Law 380, June 8, 1909; By-Law 221, July 9, 1901; By-Law 233, May 13, 1902; By-Law 257, August 11, 1903; By-Law 275, May 10, 1904; By-Law 394, June 14, 1910; By-Law 395, June 14, 1910.

22 Town of Walkerville By-Law, No. 8, June 11, 1890. This by-law authorized the Board of Works Committee to purchase sufficient quantities of "coarse gravel and other material" to keep the streets in repair. The fact that coarse gravel is mentioned so prominently seems to imply that the roads were gravel.

23 The presence of these cedar block pavements is evidenced throughout the by-laws until about 1909.

cedar block roads became dusty and required regular sprinklings by the town watering cart, a service which was paid for by a frontage tax in the early years. About 1909 concrete paving was initially introduced to Walkerville, and although isolated instances of cedar block paving occurred after 1910, new paving was almost always of the concrete variety. The earliest sidewalks in the municipality were wooden. As early as 1894, artificial stone or granolithic sidewalks were considered to be superior replacements and by 1898 the Walkerville Board of Works endorsed a program providing for an annual expenditure of $1000 in an effort to extend the town's granolithic pavements. Such was the evolution of street paving and sidewalk construction in Walkerville.

Generally, the period 1910 to 1915 was somewhat static in terms of further street extension, very probably due to a process of consolidation of settlement within the existent boundaries. By 1910, however, the commercial supremacy hitherto enjoyed by Sandwich Street appears to have fled as

---

25 Town of Walkerville By-Law, No. 191, November 14, 1899.
26 In Walkerville, the first specified concrete pavement was authorized June 8, 1909 (Town of Walkerville By-Law, No. 380, June 8, 1909).
27 Walkerville Council Minutes, May 22, 1894, p. 150; March 26, 1895, p. 217; April 24, 1895, p. 226.
28 Walkerville Council Minutes, January 10, 1899, p. 126.
Wyandotte Street became the foremost shopping centre in the town. 29 A survey of Walkerville in 1915, indicates that Lincoln Road had been extended 1300 feet south of Ottawa Street, the latter now being paved from Walker Road to the western town limits. Windermere Road had reached a point in the vicinity of the future Seminole Street; Kildare and Argyle Roads stopped at the Essex Terminal Railway tracks, while Walker Road was paved to the Tecumseh Road. The remainder of the north-south streets terminated at Ottawa Street. South of the latter artery, Iroquois Street was paved; it was the only east-west street south of Ottawa Street. 30 Although as

29 This conclusion has been attained through a comparison of the businesses located on Sandwich Street and Wyandotte Streets using the following directories: Union Publishing Company's Windsor Directory, Including Sandwich and Walkerville (Ingersoll: Union Publishing Company, 1891); Windsor Directory Including Sandwich and Walkerville, 1899 (Ingersoll: Union Publishing Company, 1899); Windsor Directory Including Walkerville and Sandwich, 1904 (Ingersoll: Union Publishing Company, 1904); Windsor Directory Including Walkerville and Sandwich, 1910 (Ingersoll: Union Publishing Company, 1910).

30 The development of the town was obtained through the following Town of Walkerville By-Laws: By-Law 416, November 14, 1911; By-Law 437, June 11, 1912; By-Law 442, November 12, 1912; By-Law 446, November 12, 1912; By-Law 471, July 8, 1913; By-Law 476, July 8, 1913; By-Law 477, July 8, 1913; By-Law 478, July 8, 1913; By-Law 480, July 8, 1913; By-Law 537, August 7, 1914; By-Law 538, August 7, 1914; By-Law 542, August 7, 1914; By-Law 545, August 7, 1914; By-Law 546, August 7, 1914; By-Law 597, September 14, 1915. In order to verify my conclusion, I cite the following located in the (Essex County Registry Office, Plan of the Town of Walkerville, County of Essex, Ontario by Owen McKay, Ontario Land Surveyor, Walkerville, May 23, 1916. Cited hereafter as Plan of the Town of Walkerville). This plan is precisely the same as my conclusion with the exception, I believe, that Lincoln Road is produced to the Tecumseh Road in the Plan. However this was not sanctioned until September, 1916 (Town of Walkerville By-Law, No. 639, September 12, 1916).
previously indicated, some of the streets extended south of Ottawa Street, settlement in the latter area must have been only scattered and sparse.31

Five years later, in 1920, Lincoln, Walker and Kildare Roads all terminated at the Tecumseh Road. Portions of Seminole and Seneca from the west town limits east to Kildare Road had been paved and immediately south of Ottawa Street, Iroquois, Dacohtah and Oneida Courts were now paved. Windermere extended some distance south of Ottawa Street and Argyle's southern terminus remained the Essex Terminal Railway tracks. Monmouth and Chilver Roads still ended at Ottawa Street.32 The decade between 1910 and 1920 was characterized by an enormous program of alley paving. Habitually the surfacing of the alleys failed to keep pace with that of the streets, but fell considerably behind the latter.33 In 1920,

31 The extent of settlement may be partially resolved by determining the extent of street lighting, which terminated at Ottawa Street with the exception of Windermere, Lincoln and Walker Roads (Town of Walkerville By-Law, No. 568, January 20, 1915). I agree with Morrison who states that in 1918 buildings south of Ottawa Street were few in number (N. F. Morrison, Garden Gateway to Canada [Toronto: Ryerson Press, 1954], p. 265).

32 Town of Walkerville By-Law 639, September 12, 1916; By-Law 763, August 12, 1919; By-Law 795, March 31, 1920; By-Law 801, June 8, 1920; By-Law 802, June 8, 1920; By-Law 813, September 14, 1920.

33 The following Town of Walkerville By-Laws represent the abundance of alley paving in the period 1910-1920: By-Law 436, June 11, 1912; By-Law 472, July 8, 1913; By-Law 481, July 8, 1913; By-Law 515, March 10, 1914; By-Law 539, August 7, 1914; By-Law 540, August 7, 1914; By-Law 543, August 7, 1914; By-Law 544, August 7, 1914; By-Law 566, October 3, 1914;
a feature of the Walkerville scene for nearly sixty years disappeared, with the removal of the Walker cattle barns at the north-west corner of Tecumseh and Walker Roads. 34

In 1921 and 1922, Windermere Road was extended to the Tecumseh Road and street development commenced south of the latter road with the paving of portions of Turner, Byng, Lens and Somme Roads. Tecumseh Road, too, was paved from Walker Road to the western town limits. The year 1922 also witnessed the subdivision of the seventeen acre plot bounded by Huron Street (Richmond Street), Niagara Street, Devonshire and Monmouth Roads into two east-west streets, the northern-most Navaho and the southern Cayuga. 35 These two streets were later joined to form present-day Willistead Crescent.

The aforementioned plot was the site of the Walkerville Country Club for some years, where the two dominant sports were golf and lawn tennis. 36 Although the latter was

By-Law 594, July 13, 1915; By-Law 595, August 10, 1915; By-Law 602, March 14, 1915; By-Law 631, June 13, 1916; By-Law 636; June 18, 1916; By-Law 642, October 11, 1916; By-Law 661, May 8, 1917; By-Law 678, September 11, 1917; By-Law 679, September 11, 1917; By-Law 680, September 11, 1917; By-Law 721, October 2, 1918; By-Law 752, June 10, 1919; By-Law 753, June 10, 1919; By-Law 754, June 10, 1919; By-Law 755, June 10, 1919; By-Law 768, November 25, 1919; By-Law 795, March 31, 1920; By-Law 803, June 8, 1920.

\textsuperscript{45} Plan of the Town of Walkerville, 1916.
The two parks constituted additional patrol work for the town constabulary, which by 1912 consisted of four men, two patrolmen, a sergeant and a chief. Their wages remained low by contemporary terms. The patrolmen were paid $75 monthly, $5 less than the sergeant, while the Chief of Police since 1887, A. B. Griffiths, was the recipient of $100 monthly. By 1917, the chief's salary was increased to $125 monthly, while the salaries of the five constables and one sergeant varied from $95 to $90 apparently depending on years of service. Two weeks annual vacation were granted to the police force, which seemed to merit such a period of relaxed inactivity since they received only a single day off every two weeks. By 1917, the force was motorized, at least to the point of a single motorcycle. In 1921, the police abandoned the "lock-up" constructed in 1897, and moved into the more centrally located garage at Willistead Park which had been donated to the town by the wife of the late Edward Chandler Walker.

in 1921. In the same year, 1921, James P. Smith became the new Chief of the Walkerville Police Force.

The Walkerville Fire Department started in 1877 by Hiram Walker remained a Walker enterprise throughout the period of this study. Though still a private company, this organization provided fire protection to the townspeople without charge until March 1, 1916, at which time the town agreed to contribute $10,000 per annum toward the maintenance of the brigade. In the latter part of 1922, Walker Sons, Limited, still owned and managed the department but indicated that they were desirous of selling it to the municipality. However no transaction took place and in October 1922, the town fathers decided to retain the services of the Walker Sons Fire Department for the sum of $35,000 per annum commencing in 1923.

The street railway which consisted of the "Belt Line" in 1897, had progressed with the town in the following years. In 1907 an additional line had been constructed from Devonshire Road, east to the Walker Road and south along that road

53 Town of Walkerville By-Law, No. 869, June 7, 1921.

57 Supra, Ch. III, p. 68.
to the Tecumseh Road. 58 Ten years later the railway company laid a track from Walker Road west to the corner of Ottawa Street and Lincoln Road. 59 Consequently, by 1920, Walkerville patrons were served by four routes: a line extending along Sandwich Street from the easterly to the westerly limits of the town; a line on Ottawa Street between Lincoln and Walker Roads; a line stretching from the Essex Terminal Railway tracks on Walker Road northerly to Wyandotte Street and west on Wyandotte to the municipal boundary between Windsor and Walkerville; a line northerly from Wyandotte Street, along Devonshire Road, then west on Assumption Street, and north on Victoria Road to intersect with the Sandwich Street operation. 60

The town's transportation system was complemented in 1921 by the introduction of a bus service inaugurated by the Windsor Bus Company. 61 The bus route started at Lincoln Road and Wyandotte Street, south on Lincoln Road to Huron Street (Richmond Street), east on Huron Street to Argyle Road, south on Argyle Road to Iroquois Street, west on Iroquois Street to Kildare Road, south on Kildare Road to Seminole Street, west on Seminole Street to Lincoln Road, south on

61 Walkerville Council Minutes, March 15, 1922; April 13, 1922.
Lincoln Road to Tecumseh Road and back over the same route to the point of origin. A second line commenced at the corner of Lincoln Road and Wyandotte Street. It proceeded south on Lincoln Road to Cataraqui Street, east on Cataraqui Street to Walker Road, thence south on Walker Road to Edna Street, east on Edna Street to the easterly town limits. Adult fares were ten cents, while children paid a nickel to ride the system.  

By 1920, Willis Ephraim, Edward Chandler, Franklin Hiram and James Harrington, the four men who as boys had accompanied their father to Canada, had followed him to the grave. In 1921, Mary Griffin Walker, the widow of the late E. C. Walker and his other heirs deeded the 15 1/2 acre property with the attractive Tudor-style mansion, Willistead, to the Town of Walkerville for public purposes. No doubt, Mrs. Walker found the luxurious home too expensive to maintain, and then too, since the Walkers had no children, a large mansion must have only accentuated her loneliness for her own family. A number of stipulations accompanied the transfer of Walkerville’s finest residence to the municipality.  

62 Ibid., August 9, 1921.  
64 Town of Walkerville By-Law, No. 869, June 7, 1921.
The legacy was to be known as Willistead Park. The shrubs, the trees, and the expensive fence which surrounds the grounds today, were all to be maintained in proper condition. Within five years of the conveyance, the town was to undertake, at its own expense, such interior alterations thought necessary to fit the buildings for public service. A portion of the picturesque mansion was to be used as a public library to be known as the Willistead Library. The exterior of the fine Tudor-style structure was to be altered only with the approval of the Ontario Association of Architects to ensure preservation of the fine architectural design of the building.65

In Willistead, the Walkers left their greatest material contribution to their town. In August, 1921, the town council moved into the second storey chamber in Willistead66 from the public building it had occupied on Sandwich Street on the site of the first St. Mary's Church.67 The police department took possession of its new quarters the same year.68 The library which still occupies the stately mansion today, was transferred to Willistead on April 8, 1922.69

68 Supra, Ch. VI, p. 161.
In 1858, farm lots ninety-four, ninety-five and ninety-six in the first concession, the Township of Sandwich East were merely tracts of waterfront real estate in no way unique from other properties in the immediate environs. Sixty-four years later, the same riverfront area was the site of a prosperous industrial community with a population of just over seven thousand souls. The town contained fifty-seven thriving establishments which provided work for 3,822 employees. Annually, these factories produced goods valued at approximately $32 million. During 1921-22, 1,235 vessels visited the town and in industrial production the community transcended the older downriver City of Windsor with a population five times as great. The name of this flourishing municipality was Walkerville, its founder was Hiram Walker, and in the latter individual lay the secret of Walkerville's success.

Psychology has unravelled many of the mysteries of humanity. For instance, it has revealed how the formative period of man's personality or character begins in babyhood. So it is with towns. With proper, loving care in infancy and adolescence, they ultimately become thriving municipalities at maturity. Walkerville was most fortunate that Hiram Walker presided at its birth and guided it to adulthood.

Undoubtedly when Walker came to Canada West, he did so as a typical entrepreneur searching for pecuniary gain.

In his initial years, Walker soon displayed his opportunism and prosperity attended his enterprise with remarkable rapidity.

Always the profit-seeker, by the middle 1870's, the distiller seems to have extended his interests to include the welfare of the settlement developing about his establishment. Very soon, his actions indicated that he was not only an opportunist, but a visionary possessed of a progressive outlook. Within two decades after his advent, the tiny village of Walkerville contained a church, school, fire brigade, water facilities including hydrants, and lighting equipment. For a settlement of its size, Walkerville's utilities were superior numerically and qualitatively.71

As he sought an efficient, well-equipped town, Walker demanded a proficient populace too. The fire department, and later the tiny police force were developed so near as was possible to perfection. The town inhabitants were carefully governed, and even a man of the cloth who proved recalcitrant, was dismissed from his post.72 Since he was the sole employer and landlord of consequence in Walkerville, the distiller was able to exercise the greatest discretion in the selection of potential inhabitants, who faced possible expulsion should they fail to emulate the founder's lofty standards. The result was a model town from conception, with a population

71Supra, Ch. II, pp. 26-32.
72Supra, Ch. II, p. 27.
loyal to Walker. Next the distiller attempted to instill a spirit of civic pride in his populace. This was achieved through resplendent uniforms and praise in the case of the firemen.\textsuperscript{73} Similarly, the constabulary was attired in the best clothes available and every effort was made by Walker to instill pride in the police force.\textsuperscript{74} The inhabitants of the hamlet became aware of their excellent circumstances and responded to Walker's overtures. The result was the evolution of a mutual respect between the townspeople and their patriarch. The Walkers never attempted to divorce themselves from their populace and made their private facilities available for bowling tournaments and lawn socials and even dances. In short, Walkerville became a model example of employer-employee harmony.\textsuperscript{75}

Simultaneously with the development of a progressive settlement, Walker built a self-sufficient hamlet, possessed of most of the niceties of life. In some of the services, such as the water system, Walkerville might have joined with neighbouring Windsor, but it didn't. Instead it preferred to travel an independent road.\textsuperscript{76} In 1880 inauguration of a Walkerville ferry service was an additional indication of

\begin{flushright}
\textsuperscript{73}Supra, Ch. II, pp. 34-35. \\

\textsuperscript{76}Supra, Ch. II, p. 45. 
\end{flushright}
the town's quest for total independence. Initially, when the electric railway entered Walkerville, the founder represented the intrusion, until he discovered that the new mode of transportation fitted into his over-all pattern. At that point the electric road was made welcome.

Irrespective of the founding of the settlement, the most important contribution Walker made to Walkerville's prosperity was through the development of the Lake Erie and Detroit River Railway. Not only did it enhance Walkerville as a self-sustaining entity, it proved to be the town's point de depart, and Walkerville, given the impetus provided by the railway, never looked back. It became an important terminus for the shipment of county produce to Detroit, and excursionists travelling over the Walker Road provided additional business for the local ferry and merchants, resulting in general prosperity. More important however, was the ensuing influx of industry influenced primarily by the nationwide shipping facilities offered by the railway through its connections with other lines. Hiram Walker furnished additional impetus to the transfer of industries to Walkerville through inducements of cheap sites and free water in addition to shipping conveniences. The founder regarded an industrial base

---

77 Supra, Ch. III, p. 46.
78 Supra, Ch. III, p. 66.
79 Supra, Ch. III, p. 77.
as the strongest asset of any town, and in this manner he aspired to build Walkerville into an industrial complex that would outstrip downriver Windsor.

While Walker was interested in industrial expansion, he did not neglect the aesthetic character of the village and so industrial development was generally limited to the Walker Road area. In an attempt to further enhance civic adornment, the distillery established annual competitions for the best flower gardens, the growth of vines on buildings and general household appearance. 80

As industries moved into the village, a need for greater housing facilities became evident to contain the influx of employees. By the late 1880’s it appeared that Walkerville was possessed of a definite future and with his customary foresight Walker envisioned a need for better roads and other facilities including additional territory that the village could never hope to acquire within the rural municipality of Sandwich East. Moreover, Walker’s village was experiencing so rapid a transition into a thriving place that Windsorites who had thought of it formerly as a mere suburb of their own town began to cast envious glances. In the late 1880’s, Windsor was experiencing a period of manifest destiny as it prepared to accept city status. Portions of Sandwich

---

West had already been added to Windsor's territorial limits and in some minds, Walkerville too, would prove a lucrative addition. Faced with the dilemma of possible annexation originating in Windsor and with a need for increased and improved facilities as a result of the industrial evolution, Hiram Walker petitioned for the incorporation of Walkerville as a town. Such action if successful would produce a two-fold result; it would probably mean that Walkerville's status quo as a self-sufficient, planned, model town would be preserved, and it would permit further industrial development and the construction of employee housing with improved services for Walkervillians. In the encouragement of additional industries to the village and in seeking incorporation, Hiram Walker's dominant position in the town was definitely challenged, albeit ever so slightly. These two actions would probably lead to a gradual decentralization of power, with some going to other industrialists and to a council elected by the town inhabitants. In incorporation and the solicitation of industries, Walker was to discover if the spirit of loyalty, co-operation, progressiveness, independence and self-sufficiency which he had striven to inculcate in the minds of Walkervillians had been securely implanted. He must have been relieved when he realized that his efforts had not been in vain.

81 Supra, Ch. IV, p. 90.
In its first decade as a town, Walkerville was governed in an efficient, progressive manner by civic-minded, industrially orientated mayors. The early mayors were long-time residents of the town. They had witnessed its growth and espoused those principles instrumental in the town's development.\textsuperscript{82} In the same progressive spirit of the founder, temporary tax exemptions were provided to new industries and to inhabitants who wished to build homes in Walkerville.\textsuperscript{83} Civic-mindedness governed council decisions, since only the

\textsuperscript{82}The following individuals occupied the Mayor's chair during the first decade of council government: from 1890 to 1892, the Mayor was H. A. Walker, a nephew of the town founder, a resident of Walkerville since 1864 and superintendent of the machinery department at the distillery, with extensive property and business interests in the town (Commemorative Biographical Record of the County of Essex, Ontario [Toronto: J. H. Beers and Co., 1905], pp. 60-61). Thomas Smith was Mayor for 1893 and part of 1894. He was proprietor of a bakery and confectionary on Susan Avenue (Union Publishing Company's Windsor Directory, Including Sandwich and Walkerville, 1891 [Ingersoll: Union Publishing Company, n.d.], p. 100). C. M. Walker, Mayor for 1894 and 1895 was a nephew of Hiram Walker, a resident of Walkerville since 1863, and he held important positions in the distillery until 1897, when he was made superintendent of the enterprise (Commemorative Biographical Record of the County of Essex, Ontario, p. 135). John Bott, Mayor for 1896, was a leading businessman in the community (Supra, Ch. III, p. 78). Thomas Reid, the head distiller in the Walker firm, and resident of Walkerville since 1862, was Mayor for the years 1897 and 1898 (Commemorative Biographical Record of the County of Essex, Ontario, p. 392). In 1899 and 1900 the Mayor was Robert Kerr, manager and director of the Kerr Engine Company, one of the initial firms to locate in the town being started in 1873 (Private Collection of Neil F. Morrison. Walkerville, Canada [n.p. Canadian Souvenir Publishing Company, June 1898], see photo, "Plant of the Kerr Engine Co., Limited"). The above listing of mayors was obtained from (Frederick Neal, The Township of Sandwich [Sandwich: Frederick Neal, 1909], pp. 201-3).

\textsuperscript{83}Town of Walkerville By-Law, No. 94, March 27, 1894.
mayor was paid, and the councillors received no remuneration. Cedar block pavements and granolithic sidewalks were introduced early, as a guarantee that modernity was still to prevail in Walkerville.

Even after incorporation, Walker's advice was sought periodically by the town fathers through E. C. Walker who resided in the municipality. The elder Walker's generosity was manifest in post-incorporation years in various town celebrations and the gift of the Victoria Jubilee Fountain to the townspeople.

Hiram Walker died in 1899. As town patriarch, he always envisioned Walkerville as a progressive, self-sustaining, model town, a separate, exclusive entity whose well-being would rest on a strong industrial basis. He endeavoured to foster a strong civic spirit, efficiency, and a unique relationship between himself and the townspeople, that of working together toward a common end - a flourishing Walkerville. His achievement resided in the inculcation of those important principles in the people of Walkerville, who responded well, and in this manner the success of Walker's affluent Town of Walkerville was assured.

As Hiram Walker was the innovator of the aforementioned principles, the primary contributions of his sons were made

84Ibid., No. 20, December 23, 1890.
85Supra, Ch. VI, pp. 155-56.
86Supra, Ch. IV, p. 108.
as imitators of their father's ideals. They introduced no innovations to Walkerville but they were steeped in the methods of the late Hiram Walker and they continued his policies. Among Hiram Walker's three sons, Edward, Franklin and James, the first was probably the most influential in the continued development of the town founded by his father. Whereas the other two brothers maintained residences in Detroit, Edward Chandler resided at Willistead in Walkerville.

In 1890, the Walkerville Land and Building Company was incorporated and the entirety of the Walker real estate holdings in Walkerville was assigned to the management of this firm. Edward C. Walker served as president for many years until his death in 1915, while his brothers were directors in the company. After 1890, this corporation gradually disposed of the Walker real estate assets to private persons. In the process of this task, the firm influenced the planning of the town tremendously. Many streets were opened, trees were planted, sidewalks and streets laid through the petitions of the Walkerville Land and Building Company. The contests for best flower-bed, vine-covered homes and general household appearance inaugurated by the late Hiram Walker were retained in an endeavour to maintain past aesthetic

88 The Town of Walkerville By-Laws and the Town of Walkerville Council Minutes both verify this statement on numerous occasions.
standards and so Walkerville never lost the flavor of a model town.

Although Edward C. Walker spent a goodly portion of his time outside Canada in the pursuit of artistic treasures, he and his two brothers actively participated in many of Walkerville's social functions. In this way the relationship between the sons and the townspeople prospered and mutual respect was prevalent. Hiram Walker's spirit of generosity proved to be hereditary and in 1904 his sons erected the new St. Mary's Church as a memorial tribute to their late parents. The environs of this ecclesiastical structure superbly reflected the Walker fetish for town planning. The private fire department founded in 1877 continued to provide free protection to town inhabitants until 1916, when an annual rent was charged from the municipality. The brigade, however, remained a private enterprise throughout the duration of this study.

Even though the Walker sons carried on their father's work, they seemed to lack that zeal which was so characteristic of him. Yet such enthusiasm was no longer imperative, for Walkerville was erected on such a strong foundation that it seemed impervious to failure. As more and more Walker real estate was transferred to private ownership, the family

89 Supra, Ch. V, p. 144.

91 Supra, Ch. VI, p. 162.
influence was understandably diminished. However the legacy of progressiveness, civic pride and self-sufficiency remained with the townspeople, who as heirs guarded their inheritance carefully.

In the course of the few preceding paragraphs, the author has endeavoured to show that the Walker sons continued their father's work based on his principles, albeit less enthusiastically, until their own deaths. In such a manner, they made no contribution to an increase of the family influence in Walkerville and at J. Harrington Walker's death in 1919, the family was not nearly so powerful locally as it had been thirty-five years previously. This is not to imply that the Walker influence had disappeared by 1919, indeed some might question whether it has disappeared completely today. Neither would it be proper to ascribe the decline entirely to the three Walker sons. It had begun even before Hiram Walker's death.

Paradoxically enough, the construction of the Lake Erie and Detroit River Railway, which played so prominent a role in Walkerville's development, proved to be the very point at which the influence of the Walker family began its gradual descent. The Walker road ignited a chain reaction of events, all of which contributed to a reduction of the Walker dominance.

The immediate result of the railway was the influx of industry. The factories required employees and so the
population of Walkerville increased substantially. The village's rapid growth aroused the envy of neighbouring Windsor which was contemplating the adoption of city status, and which recently had annexed territory in Sandwich West Township. Partially motivated by the possibility of annexation by Windsor, partially due to the acceleration in the village's development, Hiram Walker sought its incorporation as a town. Such action temporarily assured Walkerville of its status as a separate municipality, but it resulted in the decentralization of power with local matters in the hands of an elected council. As the largest tax-payer in the town, Walker still retained a strong voice in municipal matters. Even this control was of a transient nature though, since the Walkervillle Land and Building Company continued to dispose of Hiram Walker's real estate to private individuals. In this way, the founder's influence as land-holder and tax-payer was diminishing steadily.

The death of the elder Walker in 1899 contributed greatly to the decline of the family's influence in the community. As founder of Walkerville, Hiram Walker had accumulated much respect and in turn had provided the enthusiasm and wisdom which were fundamental in the town's successful growth.

92 Supra, Ch. IV, p. 90.
93 In 1896, the Walkers paid eight-tenths of the taxes of the town (Walkerville Council Minutes, September 22, 1896, p. 397).
His sons failed to exhibit those qualities possessed by their father. Edward Chandler was the only one to reside in Walkerville. He displayed most of the characteristics attributable to an aristocrat, possibly because the difficult times familiar to Hiram Walker were unknown to himself and his two brothers. At one time the eldest son displayed an interest in horses, and kept a stable of his own for riding purposes. Entertainments on a lavish scale were held at Willistead. Edward Walker was absent from Walkerville for lengthy periods, as he and Mrs. Walker travelled extensively throughout the world, in the pursuit of paintings and objets d'art. As he became older, the master of Willistead became somewhat of a recluse, victimized as he was by a chronic illness which periodically confined him to a wheel-chair. In short, some factor always prevented Edward Chandler Walker from emulating his late father's enthusiasm and feeling for Walkerville. Either recreations and pastimes or illness prohibited him from such a role.94

Even if Edward Walker had inherited his father's energy, the development of Walkerville since the founder's death almost prohibited a return of the Walker "dictatorship" benevolent though it might have been. The population of the community by 1915 was well over 300095, additional industries

95 Population, 1871-1941, p. 100.
had located in Walkerville, and all the while the Walker
lands-holdings diminished through sales to private persons.

After the death of E. C. Walker on March 11, 1915,
neither one of the two surviving sons chose to live in the
town founded by their father. Absentee landlords seldom
enhance family influence and such was the case with the
Walker family.

In a sense, the success attained by the Walkers in
the development of Walkerville, was the factor in their
decline. Their influence waned in inverse proportion to the
municipality's growth, and the town ultimately became too
progressive for even the most enterprising of the Walkers.

Three centuries ago, England's most renowned drama-
tist puzzled the importance of a name.96 In the name Walkerville,
the initial two syllables possessed infinite connota-
tions.

Miscellaneous Sources

Private Collection of Neil F. Morrison. Interview with T. F. Crouchman, May 23, 1953. Mr. Crouchman came to Walkerville in the 1890s and worked part-time for Hiram Walker. These interviews have been conducted by N. F. Morrison, Ph.D. Dr. Morrison is an authority on the history of south-western Ontario, particularly Essex County and the Windsor area. In addition to being the author of numerous articles on local history, he is also the author of Garden Gateways to Canada (Toronto: Ryerson, 1954). Morrison has assured the author of this thesis that the interviews were done carefully, and questionable points were later clarified by those interviewed wherever possible. The author has in his possession temporarily, many of Dr. Morrison's interviews and has found a very substantial degree of corroboration to exist among them.

---------. Interview with J. A. Finnie, October 5, 1947 and November 15, 1947. Personally conducted by N. F. Morrison. Mr. Finnie was a resident of Windsor since 1864. He lived on Riverside Drive at Langlois Avenue and for many years was a fireman on the Great Western Railway. Thus he was quite familiar with the waterfront area. Although in his late eighties when interviewed, some of the notes are written in his own hand.

---------. Interview with Mrs. C. S. King, November 19, 1955. Personally conducted by N. F. Morrison. Mrs. King now resides at 982 Devonshire Road, Windsor. Her husband was the son of the late Dr. King of Kingsville, a close business associate of Hiram Walker, the founder of Walkerville.

Report

Unpublished Materials

Burton Historical Collection, Detroit Public Library. Burton, C. M. "Notes on Early Detroit Merchants, Etc."

Carnegie Library, Windsor. Chauvin, Francis X. "Digest of the Life of Hiram Walker".

--------. Daniels, Robert L. Re-Willistead, Residence of the Late Edward Chandler Walker. Submitted September, 1943.

Today Mr. Daniels resides at 2020 Willistead Crescent, Windsor. For years he was closely associated with the Walkers in their various enterprises, especially the Walkerville Land and Building Company. In 1922 he was a director and the secretary-treasurer in this company which was responsible for planning the eastern portions of the Town of Walkerville. His relationship with the Walkers would certainly enable him to write most authoritatively on Willistead, the residence of E. C. Walker.

This work is very eulogistic toward Hiram Walker. However, if this characteristic is ignored the work seems to possess a high degree of reliability. Unfortunately there is no documentation throughout the work nor does it contain a bibliography. In many instances the detail seems to indicate that the author had access to primary source materials. The treatment given the Walkerville ferry service provides such an example. As the title
indicates the work is concerned strictly with the "Walker Institutions" and the development of the town is ignored. It is in typescript and is a copy of the original, the whereabouts of which is apparently unknown.

Hume, Anne. "Library Service in Walkerville, December 1896-December 1936. Condensed from the Original Copy for the Use of the City Planning Commission, June 1945".

Miss Hume has apparently compiled this work from the Annual Reports of the Windsor Public Library and from the Minutes of the Board of Management of the Walkerville Public Library. In October 1920, Miss Hume became the librarian at Willistead, a position which she retained throughout the period covered by this thesis. Thus any additional information not derived from the above-mentioned sources was probably derived from her own personal experience. This study has been checked by the author of this thesis with the Annual Reports of the Windsor Public Library and the Minutes of the Board of Management of the Walkerville Public Library and was found to be most reliable.

In the possession of the author. Letter from the Historical Section, Army Headquarters, Ottawa, July 24, 1963 to R. G. Hoskins, the author of this thesis.

Lincoln Road United Church Archives, Windsor. Brownell, W. J. comp. "Lincoln Road United Church-Data from Year Books, Minute Books, Legal Documents, Etc. Above Data Assembled without Adequate Double Check by W. J. Brownell, April 15, 1941".

This compilation has been checked with many of the original documents by the author of this thesis and has been found to possess a very high degree of reliability.

VITA AUCTORIS

Family: Ronald Gerald Hoskins, only son of Roy Hoskins and his wife Julia Jacqueline Staples; born October 12, 1938, at Windsor, Ontario. Unmarried.

Education:

1944-1958 Received elementary and secondary education at King George Public School and Walkerville Collegiate Institute, Windsor. Secondary School Graduation Diploma, 1958.

1958-1961 Registered as undergraduate in the General Course in the Faculty of Arts and Sciences at Assumption University of Windsor, Windsor, Ontario. Bachelor of Arts Degree, in History and English, conferred June 3, 1961.

1961-1964 Registered as post-graduate student at Assumption University of Windsor, September 1961. Admitted to Faculty of Graduate Studies as a candidate for the Degree of Master of Arts, in History, September 1962. Thesis submitted April 1964; graduated May 23, 1964, from the University of Windsor.

Other Activities:

1963 Delegate to the Fifth Seminar on Canadian-American Relations at the University of Windsor, November 1963.

Awards:
