

Date:

I, Natalie Gosselin, hereby give my consent to Brayden LaBute to use data I generated in (Chapter 3- Early examination of fertility in male and female *Plk4*^{+/-} mice) in his dissertation. I am aware that he has given me credit for my contributions.

Specifically, I compiled/analyzed mouse and testes weight data provided by Brayden and generated the graphs. I performed the sperm assays and generated the accompanying graphs. Lastly, I compiled/analyzed mouse mating data provided by Brayden and generated the graphs.

Sincerely,

Natalie Gosselin
Ph.D. Candidate
