Examining the Impact of a Compassion Fatigue Resiliency Program on Cancer Program Staff: A Pilot Study

Embedded Experimental Study Model

WHAT DID WE FIND?

FINDINGS

- “It’s made me a lot more aware about what the symptoms are, you can really begin to see it in people or yourself that you maybe haven’t noticed before.”
- “It gave me permission to say, I need to take care of myself”
- “If you have balance, you’re taking better care of yourself. You’re going to be a lot happier with what you do. That’s going to benefit your patients and yourself.”

FINDINGS

- “We are aware we need help. The nice thing for us is it’s a supportive environment. I think if this was all individual we wouldn’t go”
- “You recognize what’s urgent and what’s not and where to draw the line because at the end of the day when you go home late, you’ve got to look after your family and they suffer and you suffer.”
